Hereby, EASTMAN KODAK COMPANY, declares that this Digital Photo Printer is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
**WARNING:**
TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

**CAUTION:**
TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK)
NO USER-SERVICEABLE PARTS INSIDE
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute the risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

The “Caution, hot surface” symbol indicates that the marked item may be hot and should not be touched.

The “Electro Static Discharge (ESD) warning” symbol indicates that trouble (including equipment malfunction) due to static electricity may occur in certain conditions.

The “OFF/ON” symbol indicates connection to or disconnection from the mains, at least for mains switches.

The “Alternating current” symbol indicates that the equipment is suitable for alternating current only.
CAUTION:
Changes or modifications not expressly approved by the party responsible for compliance could void
the user’s authority to operate the equipment.

NOTE:
This equipment has been tested and found to comply with the limits for a Class A digital device,
pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection
against harmful interference when the equipment is operated in a commercial environment. This
equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in
accordance with the instruction manual, may cause harmful interference to radio communications.
Operation of this equipment in a residential area is likely to cause harmful interference in which case
the user will be required to correct the interference at his or her own expense.

Operation is subject to the following two conditions;
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired
operation of the device.

WARNING:
In the USA or Canada, use the AC power cord according to the recommendations as
below, in order to comply with UL60950-1 and CAN/CSA C22.2 No. 60950-1-03.
Connect to the 120 V receptacle of the room or the host equipment.
The AC power cord should be UL or CSA approved and consist of type SVT, size
16 or 18AWG, length 2 m or shorter cord with IEC60320-1/C13 type, 125 V 10 A or
higher rating connector and NEMA 5-15 type, 125 V 10 A or higher rating plug.
Use the AC power cord as specified above, so as not to interfere with radio and
television reception.
If you use other cables, it may cause interference with radio and television reception.

WARNING:
In Europe, use the AC power cord according to the recommendations as below, in
order to comply with EN60950-1.
Connect to the 230 V receptacle of the room or the host equipment.
The AC power cord should be VDE approved and consist of core size 0.75 mm² or
bigger, length 2 m or shorter cord with IEC60320-1/C13 type, 250 V 10 A or higher
rating connector and CEE(7/VII type, 250 V 10 A or higher rating plug.
Use the AC power cord as specified above, so as not to interfere with radio and
television reception.
If you use other cables, it may cause interference with radio and television reception.

WARNING:
The socket outlet shall be installed near the equipment and shall be easily accessible.

Note: This symbol mark is for EU countries only.
This symbol mark is according to the directive 2002/96/EC Article 10 Information for users and Annex IV, and/or
to the directive 2006/66/EC Article 20 Information for end-users and Annex II.

Your EASTMAN KODAK COMPANY product is designed and manufactured with high quality materials and
components which can be recycled and/or reused.
This symbol means that electrical and electronic equipment, batteries and accumulators, at their end-of-life,
should be disposed of separately from your household waste.
If a chemical symbol is printed beneath the symbol shown above, this chemical symbol means that the battery
or accumulator contains a heavy metal at a certain concentration. This will be indicated as follows:
Hg: mercury (0,0005%), Cd: cadmium (0,002%), Pb: lead (0,004%)
In the European Union there are separate collection systems for used electrical and electronic products,
batteries and accumulators.
Please, dispose of this equipment, batteries and accumulators correctly at your local community waste
collection/recycling centre.
Please, help us to conserve the environment we live in!

SAFETY PRECAUTIONS

In the interest of safety, please observe the following precautions:

POWER REQUIREMENT
The Kodak 305 Photo Printer is designed to operate on 120 V AC 50/60 Hz in the U.S.A. and Canada, and 220 V - 240 V AC 50/60 Hz in Europe. Never connect to any outlet or power supply having a different voltage or frequency.

WARNING: THIS APPARATUS MUST BE EARTHED.

PROTECTIVE MEASURES

IF ABNORMALITIES ARISE, ..... Use of the printer during emission of smoke or abnormal sounds (without adopting countermeasures) is dangerous. In such a case, unplug the power cord from the source outlet immediately, and request maintenance service from the sales dealer.

NEVER INSERT ANY OBJECT INTO THE PRINTER Foreign objects of any kind inserted into this printer constitute a safety hazard and can cause extensive damage.

DO NOT PLACE ANYTHING ON THE KODAK 305 PHOTO PRINTER Heavy objects placed on the Kodak 305 Photo Printer can cause damage or obstruct proper ventilation.

PROTECT THE POWER CORD Damage to the power cord may cause fire or shock hazard. When unplugging, hold by the plug only and remove carefully.

DO NOT PLACE WATER CONTAINERS ON THE PRINTER Do not place flower vases, and other water-holding containers on the printer. If, for some reason, water seeps to the inside of the printer, unplug the power cord from the source outlet, and contact the sales dealer. If used without corrective measures, the printer may be damaged.

"In the interest of safety, avoid handling of liquids near the printer."

DO NOT REMOVE THE CABINET Touching internal parts is dangerous, besides, it may lead to malfunction. Contact the sales dealer to carry out internal checks and adjustments. Before opening the cover for eliminating a jammed paper, etc., be sure to disconnect the power cord plug.

UNPLUG THE POWER CORD DURING A LONG ABSENCE Turn off the main power switch and unplug the power cord during a long absence.

WHEN TRANSPORTING THE PRINTER When transporting the printer, remove the ribbon and print paper from the printer. See "INSTRUCTIONS FOR TRANSPORTATION" on page 19.

WHEN MOVING THE PRINTER Check that the printing unit is closed firmly. And pay attention not to press the OPEN button accidentally. When the printing unit is not closed firmly or you press the OPEN button accidentally, the printing unit may open. It can cause injury or damage.

BE CAREFUL AROUND PRINT PAPER EXIT SLOT Don’t insert your hand or any material into the paper exit slot during printing. Do not touch the cutter blade inside the paper exit slot. Otherwise, your finger will be injured.

DO NOT TOUCH THE THERMAL HEAD EXCEPT WHEN CLEANING Do not touch the thermal head (located inside the printer) except when cleaning. They are heated to high temperature and may cause burns or injury when touched. Also, malfunction caused by static electricity may occur.

WHEN PLACING THE PRINT PAPER, KEEP THE PRINT PAPER UPRIGHT When you put the print paper sideways on a table, etc., it may roll and fall. This may cause injury.

REMOVE THE TRIM TRAY WHEN OPENING OR CLOSING THE DOOR When you open or close the door with the trim tray installed, the tray may be removed and fall. This may cause injury or damage. Also, the chips generated by margin cut may jam at the paper exit slot.
SAFETY PRECAUTIONS

DO NOT LEAVE THE PRINTING UNIT OPEN
When the printer is moved with the printing unit open, it may cause injury or damage.

CLOSE THE PRINTING UNIT FIRMLY
Take care not to pinch your hand when closing the printing unit. When the printing unit is not closed firmly, it may open during transportation and it may cause injury or damage.

DO NOT PUSH DOWN ON THE PRINTING UNIT OR THE DOOR
If you push down on the printing unit or the door when they are open, this printer may fall and it can cause damage or injury.

MAINTAIN GOOD VENTILATION
Ventilation slots and holes are provided on the rear and both sides of this printer. Place the printer on a hard and level surface and keep a space between the printer and the walls to ensure proper ventilation. When putting the printer on the system rack, take a space between the printer and the back and sides of the rack.

SUITABLE LOCATIONS
Avoid shaky places or hot-springs areas where hydrogen sulfide and acidic ions are likely to be generated.

AVOID PLACES WITH HIGH HUMIDITY AND DUST
Do not place the printer at a high humidity and dusty locations. They can cause extensive damage to this printer. Avoid places where the printer is likely to be exposed to oily fumes and vapors.

AVOID PLACES LIKELY TO BE EXTREMELY HOT
Places exposed to direct sunlight, or near heating appliances can attain extremely high temperatures, which may deform the cabinet, or can become a prime cause of damage.

PLACE THE PRINTER ON A HORIZONTAL LEVEL
The printer is likely to be affected if it is placed in slanted conditions or in an unstable places.

PROTECT AGAINST DEW FORMATION
In extremely cold regions, if the printer is moved quickly from an extremely cold place to warmer one, dew is likely to be formed. If dew is formed, printing is not possible.

OPERATING AMBIENT TEMPERATURE RANGE
The operating ambient temperature range is 15°C - 30°C (59°F - 86°F) and the humidity of 30% - 80% RH. When using the printer on the system rack, be sure to keep this ambient temperature inside the rack. Depending on the internal temperature, it may take some time to start printing.

FOR LONG OPERATING LIFE

UNSUITABLE MATERIALS FOR THE KODAK 305 PHOTO PRINTER
Coat flaking and deformation are likely to occur if the printer is wiped with chemical dusters, benzine, thinner or any other solvent, if rubber or PVC items are left in contact with the printer for extended duration, or if the printer is sprayed with insecticide.

CARE OF THE CABINET
Unplug and clean with a soft cloth slightly moistened with a mild soap and water solution. Allow to dry completely before operating. Never use petroleum base solutions or abrasive cleaners.

HEAD ABRASION
The thermal head, like the video head, wears out. When it is abraded, it becomes hard to print out fine details of the picture. In such a case, it is necessary to replace the thermal head. Consult with the sales dealer for replacing the head.

CONNECTING DEVICES
Read thoroughly "Operating Precautions" of the instruction booklets for the devices connected with the Kodak 305 Photo Printer. The power cord must be disconnected after printing is over.

CAUTION ON RELOCATING
When transporting this printer, make sure it is not likely to be subjected to impacts. They can be a prime cause for damage. Further, make sure to disconnect the power cord from the power outlet, and the cables from the connected devices.
OTHER CAUTIONS

- Do not pull out nor touch the print paper until printing is completed. It may degrade the print quality or cause an error.

- Dust or other foreign matter adhering to the print paper or the ribbon cassette, or deformation resulting from exposure to extremely low or high temperatures could cause loss of color, uneven color or lines, or wrinkles in the print images.

- Clean the thermal head and platen roller to keep good print quality whenever you replace the print paper and ribbon.

- Depending on the internal temperature, the printer may stop printing temporarily during printing. (The POWER indicator blinks green.) Please wait for the printer to resume printing.
  Do not touch the print paper.

- Each time printing is completed, remove the prints. If the prints are not removed, a paper jam may occur.

- Empty the trim tray frequently to prevent jamming the strips at the print outlet.

- The paper tray is used for storing the cut print paper temporarily. The print paper may fall from the tray or may not be stored in the printed order.

NOTE:
YOUR UNDERSTANDING IS REQUESTED FOR THE LOSS OF IMAGES IN MEMORY DUE TO THE SUDDEN OCCURRENCE OF A MALFUNCTION.
AVAILABLE 2 PRINT SIZES
2 printing sizes, 10x15 (4x6") (max. 102 x 152 mm) and 15x20 (6x8") (max. 152 x 203 mm) are selectable.

300 DPI HIGH RESOLUTION
The Kodak 305 Photo Printer has a high resolution of 300 dpi for precise illustrations and sharp photographic images.

LARGE CAPACITY PRINTING
Maximum of 320 prints per roll for 10x15 (4x6") is offered. Large economical print capacity per roll reduces frequency of exchanging paper and ribbon.

HIGH QUALITY PRINTS
The Kodak 305 Photo Printer is a dye sublimation thermal transfer color printer, which produces superior high quality images. It also produces a continuous tone at 256 gradient for each of Y, M, and C.

HIGH SPEED PRINTING

HI-SPEED USB (VER. 2.0) INTERFACE SUPPORTING

MATTE PRINTING OPTION
Note: Matte is only recommended for an even number of 10x15 prints. Printing an uneven number of prints may lead to lower number of prints produced per ribbon kit.
UNPACKING

Take the printer out of the box by the following procedures. Make sure to check the accessories.

1. **Open the printer box from the top and remove the top cushion containing the accessories out of the box.**
   Remove the protective cardboard and then take the accessories out of the cushion.

2. **Carefully pull the printer up and out of the box.**
   Pull the printer straight up as shown in the figure.
   
   **NOTE**
   Printer weighs about 12 kg. Handle it with care.

3. **Unwrap the packing.**
   Remove the protective materials for transportation such as protective sheet.
   Remove the trim tray before carrying the printer.
   Hold the printer by the front and rear handle as illustrated in the drawing.

   **CAUTION**
   - Do not carry the printer with the trim tray attached and by holding the part under the trim tray. The trim tray may be removed and fall. It may cause injury or damage.
   - When the printing unit is not closed firmly or you press the OPEN button accidentally, the printing unit may open. It can cause injury or damage.

**CONTENTS**

The accessories items are placed in the top cushion. Check all items are included.

- Quick set up guide
- CD-ROM
- Paper tray
- Paper flanges
- Ribbon cassette
- Trim tray

These are contained in the printing unit.

Make sure to remove the protective materials from the ribbon cassette and paper flanges.
**FEATURES AND FUNCTIONS**

**FRONT PANEL**

1. **TRIM TRAY**
   Holds the paper strips generated by margin cut. Empty the tray frequently to prevent jamming the strips at the print outlet.

   **NOTE**
   Remove the tray before opening the door. If the door is opened with this tray attached, the printer or this tray may be damaged. Do not remove the tray during printing. It may cause a malfunction.

2. **CONNECTOR COVER**
   Do not open the cover during normal use.

3. **ALARM INDICATOR (△)**
   This indicator illuminates or blinks when a paper jam occurs or the door is open. See page 16.

4. **PAPER RIBBON INDICATOR (□/△)**
   When an error concerning the ribbon or print paper occurs, this indicator illuminates or blinks. See page 16.

5. **POWER INDICATOR (オン)**
   When the power is turned on, the indicator illuminates. It normally illuminates green, however, blinks or illuminates orange depending on the printer status. See page 16.

6. **PRINT OUTLET**
   The printed paper comes out here.

7. **OPEN BUTTON (¥)**
   Press to release the printing unit out.

8. **PRINTING UNIT**
   Open to load print paper or ribbon. Press the ¥ OPEN button to release the printing unit.

9. **DOOR**
   Open the door to mount print paper.

**OPENING THE DOOR**
Pull out the printing unit by pressing the OPEN button and then pull the knob to open the door.
FEATURES AND FUNCTIONS

TRIM TRAY
Hook and pull up the trim tray to attach it firmly. Hold and pull the handle on the lower part of trim tray to remove.

PAPER TRAY
Engage the upper hooks of the tray on the protrusions on the top of the margin cut box (1). Then, secure the tray by engaging the lower hooks in the holes on both sides of the box (2).

REAR PANEL

1. POWER SWITCH
   Use to switch the power ON and OFF.

2. POWER SOCKET (AC LINE)
   Use to connect the provided power cord. Insert the cord firmly.

3. FAN COVER / HANDLE FOR TRANSPORTING
   When carrying the printer, hold this handle and the front upper part of the printer.

4. USB TERMINAL
   Use to connect the USB cable. See page 15.

5. SECURING HOLES FOR THE CABLE TIE
   Use to secure the power cord or USB cable by using the cable ties.
Before printing, follow the printer setup listed below.

1. Install the print paper to this printer. (See pages 10 to 11.)
2. Install the ribbon to this printer. (See pages 12 to 13.)
3. Connect the printer to a personal computer. (See page 15.)

Make sure to close the printing unit when the setup procedure is completed.
PRINT PAPER INSTALLATION

1. Attach the supplied paper flanges to both sides of the print paper.
   When you pinch the latches on the paper flange, the stoppers retract into the shaft. Attach the flanges to the print paper with the stoppers retracted. Make sure that the flanges are attached to the print paper securely, and release the latches.

   **NOTE**
   - Take care not to pinch your fingers.
   - Do not remove the sticker on the print paper roll yet.
   - Do not loosen the paper roll. Any slack in the print paper may degrade the print quality.

   **CAUTION**
   - When placing the print paper, keep the print paper upright.
   - When you put the print paper sideways, it may roll and fall. This may cause injury.

   **NOTE**
   - Fingerprints or dust on the paper’s surface may degrade print quality and cause paper jams.

2. Press the POWER switch on the rear panel to turn on the power.

3. After the POWER indicator’s color has changed from orange to green, press the OPEN button to release the printing unit out.

4. Remove the trim tray and then pull the knob to open the door.
**BEFORE OPERATION**

5. **Install the print paper into the printer.**
   Install the print paper into the printer. Place the printing paper in the correct orientation. Make sure the paper roll is firmly installed.

   **CAUTION**
   Do not push down on the printing unit or the door. If you push down on the printing unit or the door when they are open, this printer may fall and it can cause damage or injury.

6. **Remove the sticker and insert the print paper between the roller and guide as shown right to feed it. When the buzzer sounds, stop the paper feeding.**
   Remove the sticker before inserting the print paper between roller and guide. Make sure to insert the paper straight. Buzzer continues to sound until the printing unit is closed.

   **NOTE**
   • Keep the rollers clean. Dirt on the rollers may produce poor print quality.
   • When taking the print paper out, pull it up toward you by holding the paper flanges.
   • Make sure to turn on the power before replacing the print paper.
   • Make sure to eliminate any slack from the print paper. If you carry out the following steps without eliminating the slack, the print paper may be damaged.

7. **Close the door.**
BEFORE OPERATION

RIBBON INSTALLATION

After installing the print paper, install the ribbon cassette into this printer.
Before installing the ribbon cassette into this printer, load the ribbon in the ribbon
 cassette.
It is recommended to clean the thermal head to keep good print quality when you replace
the print paper and ribbon.

- Place the ribbon cassette on a flat surface, when loading the ribbon.
- Select a place that is free of dust when loading the ribbon. Dust or dirt settling
  on the ribbon results in poor print quality.
- Make sure that the shafts of the ribbon fit into the ribbon cassette firmly.

1 Load the ribbon in the ribbon cassette as shown below.
Make sure to load it in the correct position.

[Diagram showing ribbon installation]

Make sure to set the ribbon roller to the ditches firmly.
Turn the shaft to eliminate any slack.

2 Place the ribbon cassette containing the ribbon in the
position as shown in the illustration.
To insert the ribbon cassette, align the protrusions on both sides of the
 cassette with the right and left guides inside the printing unit and slide it in
a slanting direction.
Mount the ribbon cassette to the back firmly by holding the handle.

- Do not touch the thermal head.
  Fingerprints or dust on the thermal head will degrade the print quality.

- CAUTION
  Do not touch the thermal head right after printing because it is
  extremely hot. Otherwise you may get burned or injured.

- NOTE
  Note that the thermal head is quite sensitive to static electricity. When
  you touch the thermal head while carrying static electricity on your
  body, the thermal head may be damaged.
**BEFORE OPERATION**

3. **Push the printing unit to close.**
   Close the printing unit by pushing the right and left sides of the unit from the front with both hands.
   When a new paper is loaded and the printing unit is closed with the power turned on, the paper will be automatically fed and cut.

   **CAUTION**
   When closing the printing unit, be careful not to get your hands caught between the printer and the printing unit. Otherwise, you may get injured.

   **NOTE**
   • When closing the printing unit, push it until a click is heard.
   • If the PAPER RIBBON indicator illuminates when the printing unit is closed, the print paper may have not been installed correctly. In this case, open the printing unit to make sure that the print paper has been installed correctly. Then close the printing unit again.
   • When the paper roll is reinstalled more than three times, the print paper may be used up earlier than the ribbon.

**Installation of the print paper and the ribbon is completed.**

   **NOTE**
   • Make sure to replace the print paper and the ribbon simultaneously. A large amount of print paper may remain depending on the used condition.

   **NOTE**
   • Empty the trim tray frequently to prevent jamming the strips at the print outlet. Whenever you replace the paper and ribbon, make sure to throw away the paper strips in the trim tray.
   • Whenever you replace the print paper and the ribbon, clean the thermal head and the platen roller. For the cleaning procedures, see "CLEANING" (on pages 20 and 21).
BEFORE OPERATION

HANDLING OF PAPER / RIBBON KIT

BEFORE PRINTING

- Fingerprints or dust on the paper printing surface may produce poor print quality and cause paper jams.
- When the print paper or ribbon is abruptly transferred from a cool place to a hot place, vapor or dew is generated on the surface, which causes paper jams or degraded print quality. Leave the print paper in the room to stabilize its temperature before use.
- If you repeat the PRINT PAPER INSTALLATION procedure more than the designated number of times, the indicated number of prints may not be made. In addition, if you replace the print paper before it is used up, the indicated number of prints may not be made.

AFTER PRINTING

- If the paper absorbs nonvolatile organic solvents (alcohol, ester, ketone, etc.) the print may be discolored.
- Discoloration of prints is accelerated if the print paper comes into contact with soft vinyl chloride such as transparent tape.
- Avoid storing prints in direct sunlight or places with high humidity.

STORAGE OF PAPER / RIBBON KIT

- Do not store the print paper and ribbon in the container made of soft polyvinyl chloride. They may be discolored because of chemical reaction.
- Store the print paper and ribbon out of direct sunlight and away from heating appliances in a cool, dark place where the temperature is 5°C to 30°C and the humidity is 20% to 60% RH.
BEFORE OPERATION

CONNECTION WITH USB DATA SIGNAL EQUIPMENT

CONNECTING TO PERSONAL COMPUTER (EXAMPLE)
Check that the printer is turned on before connecting procedure.

1. Turn on the power of a personal computer.

2. Connect the printer and a personal computer with a USB cable. (when the operation system to be applied is other than Windows® 7)
   Connect the printer to a personal computer as shown below.

   ![Diagram showing connection process]

   **NOTE**
   For Windows® 7 users, do not connect the printer to the computer.
   Refer to the PRINTER DRIVER GUIDE in the CD-ROM for details.

   **NOTE**
   A USB cable is not supplied with this printer. Use the USB 2.0 certified cable of 2 m or less in length.

PRINTER DRIVER INSTALLATION

The printer driver is required to print the data from the personal computer connected with this printer.

<table>

When the ALARM or the PAPER RIBBON indicator illuminates or blinks, open the door and carry out the above countermeasures.
OVERCOMING PAPER JAMS

1 Press the OPEN button to open the printing unit. Make sure that the power is turned on before opening the printing unit.

2 Remove the ribbon cassette.

3 Open the door.

4 Pull out the defective part of the print paper to the direction of an arrow.

5 Cut off the defective part of the print paper with scissors. **NOTE**
   - Make sure to cut off the printed part of the print paper. Failure to do this may result in the ribbon sticking to the print paper and being torn.
   - Make sure to clean the thermal head and the platen roller. Refer to “CLEANING” (on pages 20 and 21).

6 Remove the print paper. **NOTE**
   - Remove the slack from the print paper completely. If the door is closed with the print paper slacked, it may cause a paper jam.

7 Install the print paper and the ribbon cassette with the ribbon. (Refer to pages 10-14.)

8 Close the door.

9 Close the printing unit by pushing it.
**ERROR MESSAGES AND COUNTERMEASURES**

**REPAIRING A TORN RIBBON**

1. Position the ribbon cassette with the torn ribbon on a flat, clean surface.

2. Place a piece of transparent adhesive cellophane tape on the center of the ribbon.

3. Wind the shaft of the ribbon in the direction of the arrow so that the cellophane tape is not seen.

4. Install the ribbon cassette in the printer.
INSTRUCTIONS FOR TRANSPORTATION

When transporting this printer for some reason such as repair, follow the instructions below.

1. **Use the original packaging.**
   The genuine package unit may not endure more than one round trip. If the printer is transported with the package unit more than one round trip, it may not be guaranteed.
   Purchase another package unit when transporting this printer again.
   Pack the printer with the accessories (ribbon and print paper) removed.

2. **Close the printing unit firmly.**
   When closing the printing unit, push it until a click is heard.

   __**CAUTION**__
   When the printing unit is not closed firmly or you press the OPEN button accidentally, the printing unit may open. It can cause injury or damage.

3. **If the ribbon, print paper, or ribbon cassette cannot be taken out,** consult with your dealer.
CLEANING

Cleaning as indicated below will help maintain stable printer operation and extend the printer’s life.
Wearing gloves at cleaning is recommended to prevent injury.
Make sure to turn off the power before cleaning.

FILTER CLEANING
Clean the filter part and the ventilation inlet with a vacuum as shown right.

THERMAL HEAD CLEANING

1. Press the OPEN button to open the printing unit.
2. Take the ribbon cassette out of the printer.

Preparations
Alcohol (ethyl alcohol, etc.)
Soft and clean cloth

When lines appear on the printed images, clean the thermal head.
Wipe the head cleaning part carefully with cloth dampened with a small amount of alcohol.

NOTE
- Do not damage the thermal head.
- When the poor print quality is not corrected even if the head has been cleaned, replacement of the thermal head may be required. Contact your dealer.

CAUTION
Thermal head is hot right after printing. Wait until the head cools before cleaning the thermal head.

NOTE
- The thermal head may be damaged if you touch it while static electricity builds up on your body.

NOTE
When you clean the thermal head, make sure not to apply excessive force to the peeling roller on the bottom of the thermal head. When the excessive force is applied to the roller, the roller may be deformed, resulting in deterioration of the printing quality.
CLEANING

PLATEN ROLLER CLEANING

Preparations
Alcohol (ethyl alcohol, etc.)
Soft and clean cloth

Clean the black part of the roller.
Wipe the black part carefully with cloth dampened with a small amount of alcohol.
Wipe the whole roller by turning it.

PAPER FLANGE CLEANING

Clean the parts that contact the print paper sides as shown right.
Wipe the parts carefully with cloth dampened with a small amount of alcohol.
