1 Getting started

Package contents

1. Camera with neck strap
2. Custom dock insert (for EasyShare camera dock or printer dock)
3. Battery charger with plug(s)
4. Li-Ion rechargeable battery
5. Lens cap with strap
6. USB cable
7. Audio/Video cable (for viewing pictures and videos on television)

Not shown: User’s guide (may be provided on a CD), Start Here! guide, Kodak EasyShare software CD. Contents may change without notice.

Installing the software first

IMPORTANT: Install the software from the Kodak EasyShare software CD before connecting the camera (or dock) to the computer. Otherwise, the software may install incorrectly. See the Start Here! guide or Installing the software, page 44.
Getting started

Charging the battery
The Li-Ion rechargeable battery requires charging before first use.

1 Insert the battery into the charger.
2 Insert the plug that matches your electrical outlet.
3 Plug the charger into the outlet.

The indicator light turns red. When the indicator light turns green, remove the battery and unplug the charger. Charging takes approximately 3 hours.

You can also charge the battery using an optional Kodak EasyShare printer dock or camera dock. Purchase these and other accessories at a dealer of Kodak products or visit www.kodak.com/go/dx7590accessories.

Inserting the battery

⚠️ CAUTION:
Use only a Kodak EasyShare Li-Ion rechargeable battery.

1 Make sure the camera is turned off.
2 On the bottom of the camera, slide the battery door and lift to open.
3 Insert the battery as shown. Push the battery completely into the battery compartment.
4 Close the battery door.
Important battery information

Kodak battery replacement types/battery life

Actual battery life may vary based on usage.

<table>
<thead>
<tr>
<th>Battery Type</th>
<th>Battery Life (Approx. number of pictures)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Li-Ion rechargeable battery, 1700 mAh (KLIC 5001) (included with camera)</td>
<td>0 - 275</td>
</tr>
</tbody>
</table>

We recommend using only a Kodak EasyShare Li-Ion rechargeable battery. Not all manufacturers’ 3.7V Li-Ion rechargeable batteries are compatible with the camera. Damage caused by unauthorized accessories is not covered under warranty.

Optional battery: You can use a Kodak EasyShare Li-Ion rechargeable battery, 1050 mAh, but it is a lower power battery. Expect approximately 30% fewer pictures per full charge than with the 1700 mAh battery included with your camera.

Extending battery life

- Limit the following activities that deplete battery power:
  - Using Quickview (page 12)
  - Excessive use of the flash
  - Using the LCD screen; utilize the EVF screen instead.

- Dirt on the battery contacts can affect battery life. Wipe the contacts with a clean, dry cloth before inserting a battery in the camera.

- Battery performance is reduced at temperatures below 41° F (5° C). When using your camera in cold weather, carry spare batteries and keep them warm. Do not discard cold batteries that do not work; when they return to room temperature, they may be usable.

Visit www.kodak.com/go/dx7590accessories for:

- **Kodak EasyShare camera dock**—powers your camera, transfers pictures to your computer, and charges your battery.

- **Kodak EasyShare printer dock**—powers your camera, makes 4 x 6 in. (10 x 15 cm) prints with or without a computer, transfers pictures, and charges your battery.

- **Kodak 5-volt AC adapter**—powers your camera.
**Getting started**

**Battery safety and handling**

- Do not allow batteries to touch metal objects, including coins. Otherwise, a battery may short circuit, discharge energy, become hot, or leak.
- For rechargeable battery disposal information, see the Rechargeable Battery Recycling Corporation Web site at www.rbrc.com.

For more information on batteries, see www.kodak.com/global/en/service/batteries/batteryUsage.jhtml

**Turning the camera on and off**

- Press the On/Off button.
  
  *Your camera is ready to take pictures when the Power ring stops blinking. The EVF or the LCD screen turns on, depending on which display was last used.*

- Press the On/Off button to turn off the camera.
  
  *The camera completes operations that are in process.*

**Setting the language**

1. Turn on the camera. Press the Menu button.

2. Move the Joystick \(\uparrow\downarrow\) to highlight Setup Menu, then press the OK button.

3. Move the Joystick \(\uparrow\downarrow\) to highlight Language, then press the OK button.

4. Move the Joystick \(\uparrow\downarrow\) to choose a language: English, German, Spanish, French, Italian, Portuguese, Chinese, Korean, or Japanese.

5. When finished, press the OK button.

6. Press the Menu button to exit the menu.
Setting the date and time

Setting the date & time, first time
The message Date and Time have been reset appears the first time you turn on the camera or if the battery is removed for an extended time.
1  SET DATE & TIME is highlighted. Press the OK button.
2  Go to step 4 in Setting the date & time, anytime.

Setting the date & time, anytime
1  Turn on the camera. Press the Menu button.
2  Move the Joystick ▲/▼ to highlight Setup Menu ▓, then press the OK button.
3  Move the Joystick ▲/▼ to highlight Date & Time ▓, then press the OK button.
4  Move the Joystick ▲/▼ to adjust the date and time. Move the Joystick ◄/► to advance to the next setting.
5  When finished, press the OK button.
6  Press the Menu button to exit the menu.

NOTE: Depending on your computer operating system, Kodak EasyShare software may update the camera clock when you connect the camera. See the EasyShare software Help for details.
Changing the display, EVF or LCD

Your camera has an Electronic Viewfinder (EVF). The EVF, like the LCD (Liquid Crystal Display) screen, displays what the camera captures.

Press the EVF/LCD toggle button to change the screen from EVF to LCD, and back.

*The selection remains until you press the button again.*

NOTE: The EVF/LCD screen turns off after 1 minute if no pictures are taken. Press any button to turn the display back on.

Using the diopter dial

You can adjust the EVF sharpness for your eyesight.

- Look through the EVF.
- Turn the Diopter dial until the viewfinder image is sharp.

Checking camera and picture status

The icons that appear on the EVF/LCD screen indicate the active camera and picture settings.

Press the Status button to turn the icons off and on.
Storing pictures on a SD or MMC card

Your camera has 32 MB of internal memory. You can purchase at a dealer of Kodak products or at www.kodak.com/global/en/digital/accessories optional SD cards for removable, reusable storage for your pictures and videos.

NOTE: We recommend Kodak SD or MMC cards. Other SD brands are acceptable, but must possess the SD logo. (The SD logo is a trademark of the SD Card Association.) When using the card for the first time, format it in this camera before taking pictures (see page 31).

CAUTION: The card can only be inserted one way; forcing it may damage the camera or card. Do not insert or remove a card when the green ready light is blinking; doing so may damage your pictures, card, or camera.

1 Turn off the camera, then open the card door.
2 Orient the card as shown on the camera body.
3 Push the card all the way into the slot.
4 Close the door.

To remove the card, turn off the camera. Push the card in, then release it. When the card is partially ejected, pull it out.

See page 65 for storage capacities.
Taking pictures and videos

Taking a picture

The camera is always ready to take pictures—in Review, Share, or Setup but not in Favorites. (In Video mode, the camera captures video.)

1. Press the On/Off button.
2. Turn the Mode dial to the desired setting.

NOTE: Use Auto for general picture-taking situations. (See page 14 for other camera-mode options.)

3. Use the EVF or LCD screen to frame your subject. (Press the EVF/LCD toggle button to switch to the other. See page 6.)

   The EVF/LCD screen displays a mode description and a live view.

NOTE: To take flash pictures, open the flip-up flash (see page 20). An Open Flash warning appears on the EVF/LCD screen when the flash unit needs to be open.

4. Press the Shutter button halfway to set the Auto Focus (AF) and Auto Exposure (AE).

   The AF/AE indicator is displayed. If the focus and/or exposure fails, recompose the shot and try again.

5. Continue pressing the Shutter button completely down to take the picture.
Using the auto-focus framing marks

When using the camera EVF/LCD screen as a viewfinder, framing marks indicate where the camera is focusing. For the best pictures, the camera attempts to focus on foreground subjects, even if the subjects are not centered in the scene.

1 Press the Shutter button **halfway and hold**.
   *When the framing marks turn from blue to green, focus is accomplished.*

2 If the camera is not focusing on the desired subject (or if the framing marks disappear), release the Shutter button and recompose the scene.

3 Press the Shutter button **completely down** to take the picture.
   *NOTE: Framing marks do not appear in Landscape or Video mode. When you use Focus Zone (page 28) and set Center Zone, the framing marks are fixed at Center Wide.*
Taking pictures and videos

Capture modes

Only active camera settings are displayed:

Capture modes—shutter pressed halfway

Press the Shutter button halfway to display the active manual settings:

www.kodak.com/go/support
Taking pictures and videos

Taking a video

NOTE: You can change optical zoom before (but not during) video recording.

1 Turn the Mode dial to Video  

2 Press the Menu button. Move the Joystick ▲/▼ to highlight Video Size, then press the OK button.

3 Move the Joystick ▲/▼ to highlight the desired Size, then press the OK button.

4 To eliminate camera noise during recording, turn off Continuous AF (see page 28).

5 Use the EVF or LCD screen to frame your subject. (Press the EVF/LCD toggle button to switch to the other screen, see page 6.)

6 Press the Shutter button completely down and release. To stop recording, press and release the Shutter button again.

   During recording, REC blinks on the screen and the elapsed time is displayed.

   NOTE: If you prefer, press the Shutter button completely down and hold it for more than 2 seconds to begin recording. To stop recording, release the Shutter button. Recording also stops if the storage location is full. See page 66 for video storage capacities.
Taking pictures and videos

Quickview—Reviewing the picture or video just taken

After you take a picture or video, the EVF or LCD screen displays a Quickview for approximately 5 seconds. While the picture or video is displayed, you can:

- **Review**: If you take no action, the picture/video is saved.
- **Play (video)**: Press the OK button to play the video. Move the Joystick \( \uparrow \downarrow \rightarrow \leftarrow \) to adjust the volume. Press OK again to pause the video.
- **Share**: Press the Share button to tag a picture/video for email (see page 47) or as a favorite, or to tag a picture for print. (See page 47.)
- **Delete**: Press the Delete button while the picture/video and \( \text{ } \) are displayed.

**NOTE**: Only the final picture of exposure bracketing (see page 24) or burst series (see page 25) is displayed during Quickview. If you select Delete, all pictures in the burst series are deleted. To delete selectively, do so in Review (see page 39).
Taking pictures and videos

Using optical zoom

Use optical zoom to get up to 10X closer to your subject. Optical zoom is effective when the lens is no closer than 2 ft (0.6 m) from the subject. (See Tips for better pictures on page 34.) You can change optical zoom before (but not during) video recording.

**IMPORTANT:** Place the camera on a sturdy surface or tripod when you take high-zoom pictures.

1. Use the EVF or LCD screen to frame your subject.
2. Push the Zoom button toward Telephoto (T) to zoom in. Push it toward Wide Angle (W) to zoom out.
3. Press the Shutter button halfway and hold to set the exposure and focus, then press completely down to take the picture.

(When taking videos, press and release the Shutter button.)

Using advanced digital zoom

Use advanced digital zoom in any Still mode to get an additional 3X magnification beyond optical zoom; available settings are from 12X to 30X.

**IMPORTANT:** Place the camera on a sturdy surface or tripod when you take high-zoom pictures.

1. Push the Zoom button to the telephoto optical zoom limit (10X). Release the button, then push it again.
2. Press the Shutter button halfway and hold to set the exposure and focus, then press completely down to take the picture.

**NOTE:** You cannot use digital zoom for video recording.

**IMPORTANT:** You may notice a decrease in printed image quality when using digital zoom. The blue slider on the zoom indicator pauses, then turns red when the picture size is approximately 1 MP. For an acceptable 4 x 6 in. (10 x 15 cm) print, ensure that the slider remains blue.
Taking pictures and videos

Picture-taking modes

Use this mode | For
---|---
Auto | General picture-taking—offers an excellent balance of image quality and ease of use.
Program | Controlling exposure compensation (how much light enters the camera) and flash compensation. The camera automatically sets the shutter speed and aperture (f-stop) based on the scene lighting. Program mode offers the ease of auto shooting with full access to all menu options. Use the jog dial to select settings. (See P, A, S, M, and C modes, page 18.) Press the Menu button to change other settings.
Aperture Priority | Controlling aperture, exposure compensation, flash compensation, and ISO speed. Aperture priority mode is primarily used to control depth of field (the range of sharpness). NOTE: The aperture setting may be affected when using optical zoom. Use the jog dial to select settings. (See P, A, S, M, and C modes, page 18.) Press the Menu button to change other settings.
Shutter Priority | Controlling the shutter speed, exposure compensation, flash compensation, and ISO speed. The camera automatically sets the aperture for proper exposure. Shutter priority mode is primarily used to prevent blur when your subject is moving. To prevent camera shake, use a tripod for slow shutter speeds. Use the jog dial to select settings. (See P, A, S, M, and C modes, page 18.) Press the Menu button to change other settings.
### Use this mode

</table>
Taking pictures and videos

P, A, S, M, and C modes

Settings you change in P, A, S or M modes apply only to pictures taken in those modes. Settings you change in C mode apply only to pictures taken in that mode.

For example, if you change the Color Mode to Sepia while in P, A, S, or M mode, you still retain the default setting of Color for Auto and Scene modes.

NOTE: The settings, including Flash, are maintained for P, A, S, M, and C modes—even when you change modes or turn off the camera. Use Reset to Default (see page 29) to reset P, A, S, M, or C mode to its default setting.

Aperture—also known as f-stop, controls the size of the lens opening, which determines the depth of field. Smaller f-numbers, for example f/2.8, refers to a bigger lens opening. Larger f-numbers, for example f/8, refers to a smaller lens opening.

Larger f-numbers keep the main subject sharp; good for landscapes and well-lit conditions. Smaller f-numbers are good for portraits and low-light conditions. The highest and lowest aperture numbers may be affected by optical zoom.

Shutter speed—controls how long the shutter stays open. A shaking hand icon warns of slow shutter speeds. (Use a tripod for slow shutter speeds.)

Exposure Compensation—allows the user to manually adjust the exposure; good for controlling backlit or non-standard scenes. If the picture is too light, decrease the setting; if it’s too dark, increase the setting.

Flash Compensation—controls the flash brightness (+0.5, +1.0, –0.5, –1.0). You must be within flash range. Unavailable if flash setting is Off.

ISO—controls sensitivity of the camera sensor (80, 100, 200, 400, 800). Higher settings are more sensitive to light, but may produce unwanted “noise” in a picture. You can only use ISO 800 if you are in the 1.8 MP Picture Size setting. (See Picture Size, page 26.)

See Tips for better pictures on page 34.
Using the jog dial to change P, A, S, M, or C mode settings

The Jog dial controls the — f-number, shutter speed, exposure and flash compensations, and ISO. Use the Menu button to control all other settings.

1. Turn the Mode dial to P, A, S, M, or C.
   The mode options are displayed.
2. Use the Jog dial:
   - Rotate the Jog dial to move the cursor between the available settings.
   - Press the Jog dial to open a setting.
   - Rotate the Jog dial to change the setting.
   - Press the Jog dial to save the setting.
3. Press the Menu button to change other settings (see page 26).
4. Take a picture.
Taking pictures and videos

Using the flip-up flash

Use the flash when you take pictures at night, indoors, or outdoors in heavy shadows. You can change the flash setting in most Still modes, except Burst; the default setting is restored when you exit the mode or turn off the camera.

Turning on the flash

Slide the open flash switch to raise the flash and to turn it on.

NOTE: The flash unit must be open to use the flash and to change the flash modes. An Open Flash warning appears on the EVF/LCD screen when the flash unit needs to be open.

Changing the flash settings

Press the flash button repeatedly to scroll through the flash modes (see Flash modes table).

NOTE: The active flash icon is displayed in the EVF/LCD screen status area.

Taking pictures and videos

Flash modes | Flash fires
---|---
Auto Flash | When the lighting conditions require it.
Fill | Every time you take a picture, regardless of the lighting conditions. Use when the subject is in shadow or is “backlit” (when the sun is behind the subject). In low light, hold the camera steady or use a tripod. See Tips for better pictures on page 34.
Red-eye | Once, so the subject’s eyes become accustomed to the flash, then fires again when the picture is taken. (If the lighting conditions require flash but do not require Red-eye reduction, the flash may fire only once.)
Off | Never

NOTE: Rear-curtain-flash sync activates automatically when the flash is fired and the shutter speed is set at 1/30 second or longer. The flash fires just before the shutter closes to create a stream-of-light effect behind a moving object for a more natural appearance. This feature prevails only in S, M, and C and in Night portrait mode.

Flash settings in each mode

Flash settings are pre-set for each picture-taking mode.

* When you change to Auto or Red-eye in these modes, it becomes the default until you change it.
Using an external flash unit

Use an external flash unit when you want additional or specialized lighting. You can use the camera's built-in flash, as well, to provide extra fill flash.

1. Turn off the camera and flash unit.
2. Open the External-flash-connector cover.
3. Plug your external-flash-unit cable into the External flash connector on the camera.

*The external flash unit is live when connected to the camera. The flash synchronizes at any shutter speed. Refer to your external flash unit user's guide for details.*

NOTE: The connector accepts all standard external flash cables, maximum 500 volts.

Shooting close-up and landscape pictures

Use the Close-up/Landscape button to take pictures of scenes that are very close or very far away. (Not available in Scene modes.)

1. Set the Mode dial to any Capture mode.
2. Press the Close-up/Landscape button repeatedly until the or icon appears in the status bar.
3. Take a picture.
Taking pictures and videos

Close-up pictures

Use the Close-up setting to gain sharpness and detail in pictures at close range. Use available light instead of flash if possible. The camera automatically sets the focus distance depending on the zoom position:

<table>
<thead>
<tr>
<th>Zoom position</th>
<th>Close-up distance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wide angle</td>
<td>4.7 to 27.6 in. (0.12 to 0.7 cm)</td>
</tr>
<tr>
<td>Telephoto</td>
<td>3.9 to 6.9 ft (1.2 to 2.1 m)</td>
</tr>
</tbody>
</table>

See Tips for better pictures on page 34.

Landscape pictures

Use the Landscape setting to gain maximum sharpness of far away scenes. With this setting, the camera uses infinity auto-focus. Auto-focus framing marks (see page 9) are not available in Landscape.

Using exposure bracketing

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exposure Bracketing</td>
<td>The camera takes 3 pictures — one at +, one at 0, and one at –exposure.</td>
<td>Determine the best exposure level for your conditions based on your evaluation of 3 pictures.</td>
</tr>
</tbody>
</table>

1 Set the exposure bracketing interval. (See Exposure Bracketing Interval, page 27.)

2 In most Still modes, press the Exposure bracketing button repeatedly to choose Exposure Bracketing.

3 Press the Shutter button halfway and hold to set the auto focus and exposure.

4 Press the Shutter button completely down to take the pictures.

   The camera takes 3 pictures. To evaluate them, press the Review button. Exposure bracketing turns off after the pictures are taken.
Using exposure compensation with exposure bracketing

In P, A, and S modes, you can use exposure compensation in conjunction with exposure bracketing.

<table>
<thead>
<tr>
<th>If exposure compensation is set to</th>
<th>And if the exposure bracketing interval is set to</th>
<th>Then the exposures taken are</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.0</td>
<td>the default +/-0.3</td>
<td>-0.3, 0.0, +0.3</td>
</tr>
<tr>
<td>+1.0</td>
<td></td>
<td>+0.7, +1.0, +1.3</td>
</tr>
<tr>
<td>-1.0</td>
<td></td>
<td>-1.3, -1.0, -0.7</td>
</tr>
</tbody>
</table>

Using burst

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ ]</td>
<td>Camera takes up to 5 pictures (2 per second) while the Shutter button is pressed.</td>
<td>Capture an expected event.</td>
</tr>
<tr>
<td><strong>First Burst</strong></td>
<td>First 5 pictures are saved.</td>
<td>Example: A person swinging a golf club.</td>
</tr>
<tr>
<td>[ ]</td>
<td>Camera takes up to 30 pictures (2 per second for up to 15 seconds) while the Shutter button is pressed.</td>
<td>Capture an event when the precise timing is uncertain.</td>
</tr>
<tr>
<td><strong>Last Burst</strong></td>
<td>Last 4 pictures are saved.</td>
<td>Example: A child blowing out birthday candles.</td>
</tr>
</tbody>
</table>

1. In most Still modes, press the Burst button repeatedly to choose an option.
2. Press the Shutter button **halfway and hold** to set the auto focus and exposure.
3. Press the Shutter button **completely down and hold it** to take the pictures.

*The camera stops taking pictures when you release the Shutter button, when the pictures are taken, or when there is no more storage space.*

**NOTE:** The EVF/LCD screen will not display during burst.
Taking pictures and videos

Changing picture-taking settings

You can change settings to get the best results from your camera:

1. Turn the Mode dial to desired mode.
2. Press the Menu button. (Some settings are unavailable in some modes.)
3. Move the Joystick ▲▼ to highlight a setting, then press the OK button.
4. Choose an option, then press the OK button.
5. Press the Menu button to exit.

## Setting | Icon | Options and icons that appear in Liveview
--- | --- | ---
### Color Mode
Choose color tones.
*In Auto and Scene modes, this setting remains until you turn the Mode dial or turn off the camera.*
- High Color
- Natural Color (default)
- Low Color
- Black & White
- Sepia (for pictures with a reddish-brown, antique look.)

NOTE: EasyShare software also lets you change a color picture to black-and-white or sepia, but you cannot change a black-and-white or sepia picture to color.

Unavailable in Video mode.

### Sharpness
Control picture sharpness.
*This setting remains until you change it.*
- High
- Normal (default)
- Low

Unavailable in Auto, Scene, or Video modes.

### Reset to Default
Reset all picture-taking settings to the defaults.

### Set Album (Still)
Choose Album names.
*This setting remains until you change it.*
- On or Off

Pre-select album names before you take pictures or videos. Then, all the pictures or videos you take are tagged with those album names. See page 32.

### Image Storage
Choose a storage location for pictures and videos.
*This setting remains until you change it.*
- Auto (default)—the camera uses the card if one is in the camera. If not, the camera uses internal memory.
- Internal Memory—the camera always uses internal memory, even if a card is inserted.

### Video Length (Video)
Choose a default video length (useful in self-timer videos).
- Continuous (default)—as long as there is room on the card or internal memory, or until you press the Shutter button. Choose 5, 15, or 30 seconds duration.

### Setup Menu
Choose additional settings.

See Using setup to customize your camera.
**Taking pictures and videos**

**Using setup to customize your camera**

1. In any mode, press the Menu button.
2. Move the Joy stick to highlight Setup, then press the OK button.
3. Move the Joy stick to highlight a setting, then press the OK button.
4. Choose an option, then press the OK button.
5. Press the Menu button to exit.

### Setting | Icon | Options
--- | --- | ---

Taking pictures and videos

Putting yourself in the picture or video

Use the Self-Timer to create a 10-second delay between the time you press the Shutter button and the time the picture or video is taken.

1. Place the camera on a flat surface or tripod.
2. Select the desired Still or Video mode.
3. Press the Menu button.
4. Move the Joystick \(\uparrow/\downarrow\) to highlight Self-Timer \(\circ\), then press the OK button.
5. Press \(\uparrow\) to highlight ON, then press the OK button.
6. Compose the scene. Then press the Shutter button halfway and hold to set the exposure and focus, then press completely down. Quickly position yourself in the scene.

   The Self-Timer light on the front of the camera blinks slowly for 8 seconds (then quickly for 2 seconds) before the picture/video is taken.

   The Self-Timer turns off after you take the picture/video or if you change modes.

NOTE: The default Video Length is Continuous. The video will stop when you press the Shutter button or when no storage space remains. To change the video length, see page 29. To turn off the Self-Timer camera sounds, see page 30.

Pre-tagging for album names

Use the Set Album (Still or Video) feature to pre-select album names before you take pictures or videos. Then, all the pictures or videos you take are tagged with those album names.

First—on your computer

Use Kodak EasyShare software that came with your camera (see page 44) to create album names on your computer. (To get the latest version of EasyShare software, go to www.kodak.com/go/dx7590downloads.) Then copy up to 32 album names to the camera’s album name list the next time you connect the camera to the computer. See Kodak EasyShare software Help for details.
Taking pictures and videos

Second—on your camera

1 In any mode, press the Menu button.

2 Move the Joystick ▲/▼ to highlight Set Album ☑, then press the OK button.

3 Move the Joystick ▲/▼ to highlight an album name, then press the OK button. Repeat to select more than one album name.
   Selected albums are noted with a check mark.

4 To remove a selection, highlight an album name and press the OK button. To remove all album selections, select Clear All.

5 Highlight Exit, then press the OK button.
   Your selections are saved. If you turn on the camera screen, your album selection is displayed on the screen. A plus (+) after the album name means more than one album is selected.

6 Press the Menu button to exit the menu.

Third—transfer to your computer

When you transfer the tagged pictures and videos to your computer (see page 51), the Kodak EasyShare software opens and categorizes your pictures and videos in the appropriate album. See the Kodak EasyShare software Help for details.
**Taking pictures and videos**

**Tips for better pictures**

**Zoom**

When you use longer zoom ranges, place the camera on a flat, steady surface or ideally use a tripod.

![Images taken at f/3.7, 1/500 second](image)

**Exposure compensation**

When you want to control the exposure of backlit subjects or take images in varied light, use exposure compensation.

If the picture is too light, decrease (–) the setting; if it’s too dark, increase (+) the setting. Use the Jog dial to access this function (see page 19).
Aperture and shutter speed (Manual mode)

You can manually choose the best combination of lens aperture (f-number) and shutter speed to obtain the appropriate exposure compensation for your particular setting.

Images have a greater focus range with a larger f-number, such as f/8. But it is not the best choice when shooting a moving object, so a smaller f-number is preferred, such as f/2.8.

NOTE: Some of the shutter speeds are not shown.
**Taking pictures and videos**

**Fill flash**

Fill flash is included on your camera (see page 21), and is a popular feature. Use fill flash for sunny-day portraits to fill in those dark shadows under the eyes, nose, or under the rim of a baseball hat. It’s also useful for side- and back-lit scenes with nearby people or objects with detail you want to reveal.

Use Exposure Compensation, or Flash Compensation when needed, by adjusting the Jog dial (see page 18).

**Close ups with a close-up mode**

The flower icon 🌷 on the camera indicates you have Close-up mode. Once in Close-up mode, your camera takes sharp pictures at close range (see page 24). The camera automatically sets the focus distance depending on the zoom position. Use available light instead of the flash, if possible.

Close-up telephoto lets you keep your distance from the subject when you want to capture butterflies and bees on flowers without disturbing them.
3 Reviewing pictures and videos

Press the Review button to view and work with your pictures and videos. To save battery power, use the optional Kodak EasyShare camera or printer dock, or Kodak 5-volt AC adapter. (See www.kodak.com/go/dx7590accessories.)

Viewing single pictures and videos

1 Press the Review button.

2 Move the Joystick \( \downarrow / \uparrow \) to scroll backward or forward through pictures and videos. (For fast scrolling, hold the Joystick \( \downarrow / \uparrow \).)

3 Press the Review button to exit Review.

NOTE: Pictures taken at the 4.4 MP (3:2) quality setting are displayed at a 3:2 aspect ratio with a black bar at the top of the screen.

Checking camera status review mode

Press the Review button. The applied features of the current picture or video are displayed:
Reviewing pictures and videos

Viewing multiple pictures and videos
1  Press the Review button.
2  Move the Joystick .

NOTE: You can also press the Menu button, highlight Multi-up , then press the OK button.

Thumbnails of pictures and videos are displayed.
To display the previous or next row of thumbnails, move the Joystick .
To scroll through the thumbnails one at a time, move the Joystick .
To display a single view of the selected picture, press the OK button.

Playing a video
1  Press the Review button.
2  Move the Joystick  to locate a video. (In Multi-up view, highlight a video, then press the OK button. When a video is highlighted in Multi-up view, the video duration is displayed at the top of the camera screen.)
3  To play or pause a video, press the OK button.

NOTE: You can also press the Menu button, highlight , then press the OK button.
To adjust the volume, move the Joystick .
To return to the beginning of the video, move the Joystick during playback.
To replay the video, press the OK button.
To go to the previous or next picture or video, move the Joystick .
Reviewing pictures and videos

Deleting pictures and videos

1. Press the Review button.

2. Move the Joystick ▲▼ to locate a picture or video (or highlight one in Multi-up view), then press the Delete button.

3. Move the Joystick □■ to highlight an option, then press the OK button:
   - PICTURE or VIDEO—deletes the displayed picture or video.
   - EXIT—exits the Delete screen.
   - ALL—deletes all pictures and videos from your current storage location.

   To delete more pictures and videos, return to Step 2.

   NOTE: You cannot delete protected pictures and videos this way. Remove protection before deleting (see page 40).

Magnifying pictures

1. Press the Review button.

2. Push the Zoom button to magnify the picture between 1X and 8X.

   To see different parts of the picture, move the Joystick ▲▼ □■.

   To redisplay the picture at the 1X (original) size, press the OK button.

   To exit Magnify, press the OK button.

   To exit Review, press the Review button.

Changing optional review settings

In Review, press the Menu button to access optional review settings.

Reviewing pictures and videos

Protecting pictures and videos from deletion

1 Press the Review button.
2 Press the Menu button.
3 Move the Joystick  to highlight Protect , then press the OK button.
   The picture or video is protected and cannot be deleted. The Protect icon appears with the protected picture or video.
4 To remove protection, press the OK button again.
5 Press the Menu button to exit the menu.

CAUTION:
Formatting internal memory or an SD or MMC card deletes all (including protected) pictures, videos. (Formatting internal memory also deletes email addresses, album names, and favorites. To restore them, see EasyShare software Help.)

Viewing picture/video information

1 Press the Review button.
2 Move the Joystick  to highlight a picture/video.
3 Press the Status  button once or twice to see information about the picture/video.

Tagging pictures/videos for albums

Use the Album feature in Review to tag the pictures and videos in your camera with album names.

First—on your computer

Use Kodak EasyShare software that came with your camera (see page 44) to create album names on your computer. (To get the latest version of EasyShare software, go to www.kodak.com/go/dx7590downloads.) Then copy up to 32 album names to the camera’s internal memory. See Kodak EasyShare software Help for details.
Second—on your camera

1. Press the Review button.
2. Press the Menu button.
3. Move the Joystick ↑/↓ to highlight Album  , then press the OK button.
4. Move the Joystick ↑/↓ to highlight an album, then press the OK button.
   To add other pictures to the same album, move the Joystick ←/→ to scroll through pictures. When you see the picture you want, press the OK button.
   To add the pictures to more than one album, repeat step 4 for each album.
   The album name appears with the picture. A plus (+) after the album name means the picture was added to more than one album.

To remove a selection, highlight an album name and press the OK button. To remove all album selections, select Clear All.

Third—transfer to your computer

When you transfer the tagged pictures and videos to your computer (see page 51), the Kodak EasyShare software opens and categorizes your pictures and videos in the appropriate album. See Kodak EasyShare software Help for details.

Running a slide show

Use the Slide Show to display your pictures and videos on the camera screen. To run a slide show on a television or on any external device, see page 42. To save battery power, use an optional Kodak 5V AC adapter. (Visit www.kodak.com/go/dx7590accessories.)

Starting the slide show

1. Press the Review button, then press the Menu button.
2. Move the Joystick ↑/↓ to highlight Slide Show , then press the OK button.
3. Move the Joystick ↑/↓ to highlight Begin Show, then press the OK button.
   Each picture and video is displayed once, in the order in which you took them.

To interrupt the Slide Show, press the OK button.
Reviewing pictures and videos

Changing the slide show display interval
The default interval setting displays each picture for 5 seconds. You can change the display interval from 3 seconds to 60 seconds.

1 On the Slide Show menu, move the Joystick ▲/▼ to highlight Interval, then press the OK button.

2 Select a display interval.
   To scroll through the seconds quickly, hold the Joystick ▲/▼.

3 Press the OK button.
   The interval setting remains until you change it.

Running a continuous slide show loop
When you turn on Loop, the slide show is continuously repeated.

1 On the Slide Show menu, move the Joystick ▲/▼ to highlight Loop, then press the OK button.

2 Move the Joystick ▲/▼ to highlight On, then press the OK button.
   The slide show repeats until you press the OK button or until battery power is exhausted.

Displaying pictures and videos on a television
You can display pictures and videos on a television, computer monitor, or any device equipped with a video input. (Image quality on a television screen may not be as good as on a computer monitor or when printed.)

NOTE: Ensure that the Video Out setting (NTSC or PAL) is correct (see page 31). The slide show stops if you connect or disconnect the cable while the slide show is running.

1 Connect the audio/video cable (included) from the camera video-out port to the television video-in port (yellow) and audio-in port (white). See your television user’s guide for details.

2 Review pictures and videos on the television.
Reviewing pictures and videos

Copying pictures and videos

You can copy pictures and videos from a card to internal memory or from internal memory to a card.

Before you copy, make sure that:

■ A card is inserted in the camera.
■ The camera’s picture storage location is set to the location from which you are copying. See Image Storage, page 29.

Copy pictures or videos:

1 Press the Review button, then press the Menu button.
2 Move the Joystick ▲/▼ to highlight Copy ►, then press the OK button.
3 Move the Joystick ▲/▼ to highlight an option:
   PICTURE or VIDEO—copies the current picture or video.
   EXIT—returns to the Review menu.
   ALL—copies all pictures and videos from your selected storage location to the other location.
4 Press the OK button.

NOTE: Pictures and videos are copied, not moved. To remove pictures and videos from the original location after they are copied, delete them (see page 39).
Tags that you applied for print, email, and favorites are not copied. Protection settings are not copied. To apply protection to a picture or video, see page 40.
4 Installing the software

Minimum system requirements
- Windows 98, 98SE, ME, 2000 SPI, or XP OS
  - Internet Explorer 5.01 or higher
  - 233 MHz processor or greater
- Macintosh OS X 10.2.3, 10.3
  - Safari 1.0 or higher

Minimum hardware requirements
- 128 MB RAM (64 MB RAM for Windows 98, 98SE, 2000 SPI, or ME OS)
- 200 MB hard disk space available
- CD-ROM drive
- Available USB port
Install the software

CAUTION:
Install Kodak EasyShare software before connecting the camera or optional dock to the computer. Failure to do so may cause the software to install incorrectly.

1 Close all software applications that are open on your computer (including anti-virus software).
2 Place the Kodak EasyShare software CD into the CD-ROM drive.
3 Install the software:
   - Windows OS-based computer—if the install window does not appear, choose Run from the Start menu and type d:\setup.exe where d is the drive letter that contains the CD.
   - Mac OS X—double-click the CD icon on the desktop, then click the Install icon.
4 Follow the on-screen instructions to install the software.
   - Windows OS-based computer—select Complete to automatically install all the applications. Select Custom to choose the applications you wish to install.
   - Mac OS X—follow the on-screen instructions.

NOTE: When prompted, take a few minutes to electronically register your camera and software. This lets you receive information regarding software updates and registers some of the products included with the camera. You must be connected to your Internet service provider to register electronically. To register later, see www.kodak.com/go/register.

5 Restart the computer. If you turned off anti-virus software, turn it back on. See the anti-virus software manual for details.

For information on the software applications included on the Kodak EasyShare software CD, click the Help button in the Kodak EasyShare software.

www.kodak.com/go/support
5 Sharing pictures and videos

Press the Share button to “tag” your pictures and videos. When they are transferred to your computer, you can share them by:

<table>
<thead>
<tr>
<th></th>
<th>Pictures</th>
<th>Videos</th>
</tr>
</thead>
<tbody>
<tr>
<td>Print (page 47)</td>
<td>✔</td>
<td>✔</td>
</tr>
<tr>
<td>Email (page 47)</td>
<td>✔</td>
<td>✔</td>
</tr>
<tr>
<td>Favorites (page 49)</td>
<td>✔</td>
<td>✔</td>
</tr>
<tr>
<td>for easy organization on your computer and for sharing on your camera</td>
<td>✔</td>
<td>✔</td>
</tr>
</tbody>
</table>

NOTE: Share tags remain until removed. If a tagged picture/video is copied on the camera, the Share tag is not copied. (If a tagged picture/video is copied in EasyShare software, the Share tag is copied.) In a burst series, only the last picture is tagged during Quickview.

When can I tag my pictures and videos?
Press the Share button to tag pictures/videos:
- Any time (The most recent picture/video taken is displayed.)
- Just after you take a picture/video, during Quickview (see page 12).
- After pressing the Review button (see page 37).
**Sharing pictures and videos**

**Tagging pictures for printing**

1. Press the Share button. Move the Joystick ◀/▶ to locate a picture.

2. Move the Joystick ◀/▶ to highlight Print ▼, then press the OK button.*

3. Move the Joystick ◀/▶ to select the number of copies (0-99). Zero removes the tag for that picture.

   The Print icon ▼ appears in the status area. The default quantity is one.

4. **Optional:** You can apply a print quantity to other pictures. Move the Joystick ◀/▶ to locate a picture. Keep the print quantity as is, or press ◀/▶ to change it. Repeat this step until the desired print quantity is applied to the pictures.

5. Press the OK button. Then press the Share button to exit the menu.

* To tag all pictures in the storage location, highlight Print All, press the OK button, then indicate the number of copies as described above. Print All is not available in Quickview.

To remove the print tagging for all pictures in the storage location:

- Highlight Cancel Prints, then press the OK button.
- Select either Yes or No to delete all prints.
- Press the OK button.

Cancel Prints is not available in Quickview.

**Printing tagged pictures**

When you transfer the tagged pictures to your computer, the Kodak EasyShare software print screen opens. For details on printing, click the Help button in the Kodak EasyShare software. For more information on printing from your computer, printer dock, or card, see page 51.

NOTE: For the best 4 x 6 in. (10 x 15 cm) prints, set the camera to the 4.4 MP (3:2) print quality setting (see page 26).

**Tagging pictures and videos for emailing**

**First—on your computer**

Use Kodak EasyShare software that came with your camera to create an email address book on your computer. (To know the latest version EasyShare software, go to www.kodak.com/go/dx7590downloads.) Then copy up to 32 email addresses to the camera’s internal memory. See the Kodak EasyShare software Help for details.

www.kodak.com/go/support
Sharing pictures and videos

Second—tag pictures/videos on your camera

1. Press the Share button. Move the Joystick ◄/► to locate a picture/video.

2. Move the Joystick ◄/► to highlight Email ■, then press the OK button.
   The Email icon ■ appears in the status area.

3. Move the Joystick ◄/► to highlight an email address, then press the OK button.
   To tag other pictures/videos with the same address, move the Joystick ◄/► to scroll through them. When the picture you want is displayed, press OK.
   To send the pictures/videos to more than one address, repeat step 3 for each address.
   Selected addresses are checked.

4. To remove a selection, highlight a checked address and press the OK button. To remove all email selections, highlight Clear All.

5. Move the Joystick ◄/► to highlight Exit, then press the OK button.
   The Email icon ■ appears in the status area.

6. Press the Share button to exit the menu.

Third—transfer and email

When you transfer the tagged pictures and videos to your computer (see page 51), the email screen opens and lets you send them to the addresses you specified. See the Kodak EasyShare software Help for details.
Tagging pictures as favorites

You can store your favorite pictures in the Favorites section of your camera’s internal memory, then share them with friends and family.

NOTE: When you transfer pictures from your camera to your computer, all pictures (including favorites) are stored on your computer at full size. Favorite pictures—smaller copies of your originals—are loaded back to your camera, so you can share and enjoy more.

Share your favorite pictures in 4 easy steps:

1. Take pictures

2. Tag pictures as favorites

3. Transfer pictures to your computer

4. View favorites on your camera

NOTE: The camera holds a limited number of favorites. Use Camera Favorites in the EasyShare software to customize the size of your camera Favorites section. For more information, click the Help button in the Kodak EasyShare software.

www.kodak.com/go/support
Sharing pictures and videos

Optional settings
In Favorites mode, press the Menu button to access optional settings.

<table>
<thead>
<tr>
<th>Slider</th>
<th>Option</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="#" alt="Slide Show" /></td>
<td>Slide Show (page 41)</td>
</tr>
<tr>
<td><img src="#" alt="Remove all favorites" /></td>
<td>Remove all favorites (page 50)</td>
</tr>
<tr>
<td><img src="#" alt="Multi-up" /></td>
<td>Multi-up (page 38)</td>
</tr>
<tr>
<td><img src="#" alt="Setup Menu" /></td>
<td>Setup Menu (page 30)</td>
</tr>
</tbody>
</table>

NOTE: Pictures taken at the 4.4 MP (3:2) quality setting are displayed at a 3:2 aspect ratio with a black bar at the top of the screen. (See Picture Size, page 26.)

Removing all favorites from your camera
1. Turn the Mode dial to Favorites 📌.
2. Press the Menu button.
3. Highlight 📌, then press the OK button.
   All pictures stored in the Favorites section of internal memory are removed. Favorites are restored to your camera the next time you transfer pictures to the computer. To remove single favorites, do so in EasyShare software.
4. Press the Menu button to exit the menu.

Preventing favorites from transferring to the camera
1. Open the Kodak EasyShare software. Click the My Collection tab.
2. Go to the Albums view.
3. Click the Camera Favorites Album for your camera.
4. Click Remove Album.
   The next time you transfer pictures from your camera to the computer, use the Camera Favorites Wizard/Assistant in EasyShare software to recreate your Camera Favorites Album or to turn off the Camera Favorites feature.

Printing and emailing favorites
1. Turn the Mode dial to Favorites 📌. Press ⇨ to locate a picture.
2. Press the Share button.
3. Highlight Print 📌, or Email 📧, then press the OK button.
   NOTE: Favorites that were taken on this camera (not imported from another source) are good for a 4 x 6 in. (10 x 15 cm) print.
6 Transferring and printing pictures

⚠️ CAUTION:
Install Kodak EasyShare software before connecting the camera or optional dock to the computer. Failure to do so may cause the software to install incorrectly.

Transferring pictures/videos with the USB cable

1. Turn off the camera.
2. Plug the labeled end of the USB cable into the labeled USB port on your computer. See your computer user’s guide for details.
3. Plug the other end of the USB cable into the labeled USB port on the camera.
4. Turn on the camera.

Kodak EasyShare software opens on your computer. The software prompts you through the transfer process.

NOTE: Visit [www.kodak.com/go/howto](http://www.kodak.com/go/howto) for an online tutorial on connecting.

Also available for transferring

You can also use these Kodak products to transfer your pictures and videos:
- Kodak EasyShare camera dock, Kodak EasyShare printer dock
- Kodak multi-card reader, Kodak SD multimedia card reader-writer

Purchase these and other accessories at a dealer of Kodak products or [www.kodak.com/go/dx7590accessories](http://www.kodak.com/go/dx7590accessories).
Transferring and printing pictures

Printing from a Kodak EasyShare printer dock or your computer

Computer—Click the Help button in the Kodak EasyShare software for details on printing from your computer.

Printer dock—Dock your camera to the Kodak EasyShare printer dock and print directly with or without a computer. Purchase this and other accessories at a dealer of Kodak products or www.kodak.com/go/dx7590accessories.

Printing from an optional SD or MMC card

■ Automatically print tagged pictures when you insert your card into a printer with an SD or MMC card slot. See your printer user’s guide for details.
■ Make prints at an SD or MMC card-capable Kodak picture maker. (Contact a location prior to visiting. See www.kodak.com/go/picturemaker.)
■ Take the card to your local photo retailer for professional printing.

Ordering prints online

Kodak EasyShare print service (provided by Ofoto, www.ofoto.com) is one of the many online print services offered in the Kodak EasyShare software. You can easily:

■ Upload your pictures.
■ Edit, enhance, and add borders to your pictures.
■ Store pictures, and share them with family and friends.
■ Order high-quality prints, photo greeting cards, frames, and albums—and have them delivered to your door.

Direct printing with a PictBridge-enabled printer

Your camera features PictBridge technology, which lets you print directly to PictBridge-enabled printers, without a computer. You need:

■ Camera with fully charged batteries, or with optional Kodak 5-volt AC adapter
■ PictBridge-enabled printer
■ USB cable included with your camera
Connecting the camera to the printer

1. Turn off the camera and printer.
2. Optional: If you have a Kodak 5-volt AC adapter (optional accessory), plug it into the camera and into an electrical outlet.

**IMPORTANT:** Do not use the AC adapter included with the Kodak EasyShare camera dock or printer dock to power your camera.

3. Using the USB cable that came with your camera, connect the camera to the printer. (See your printer user’s guide for details.)

Printing pictures

1. Turn on the printer. Turn the camera Mode dial to Auto.

   The PictBridge logo is displayed, followed by the current picture and menu. (If no pictures are found, a message is displayed.) If the menu interface turns off, press any button to redisplay it.

2. Move the Joystick ▲/▼ to choose a printing option, then press the OK button.

<table>
<thead>
<tr>
<th><strong>Current Picture</strong></th>
<th>Press ◀/▶ to choose a picture. Choose the number of copies.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Tagged Pictures</strong></td>
<td>If your printer is capable, print pictures that you tagged for printing (see page 47) and choose a print size.</td>

<td>Print all pictures in internal memory, on a card, or in Favorites. Choose the number of copies.</td>
</tr>
<tr>
<td><strong>Image Storage</strong></td>
<td>Access internal memory, a card, or Favorites.</td>
</tr>
</tbody>
</table>

**NOTE:** During direct printing, pictures are not permanently transferred or saved to the computer or printer. To transfer pictures to your computer, see page 51. If you turned the Mode dial to Favorites, the current favorite picture is displayed.

Disconnecting the camera from the printer

1. Turn off the camera and printer.
2. Disconnect the USB cable from the camera and the printer.
## Troubleshooting

When you have questions about your camera, start here. Additional technical information is available in the ReadMe file located on the Kodak EasyShare software CD. For updates to Troubleshooting information, see www.kodak.com/go/dx7590support.

### Camera problems

Troubleshooting

Computer/connectivity problems

<table>
<thead>
<tr>
<th>If...</th>
<th>Try one or more of the following</th>
</tr>
</thead>
</table>
| Computer does not communicate with the camera | ■ Turn on the camera.  
■ Insert a charged battery (page 2).  
■ Make sure USB cable is securely connected on camera and computer port (page 51).  
■ Make sure the EasyShare software is installed (page 44). |
| Pictures do not transfer to computer | ■ Click the Help button in the EasyShare software. |
| Slide Show does not run on an external video device | ■ Adjust the camera Video Out setting (NTSC or PAL, page 31).  
■ Make sure the external device settings are correct (see the device’s user’s guide). |

Picture quality problems

<table>
<thead>
<tr>
<th>If...</th>
<th>Try one or more of the following</th>
</tr>
</thead>
</table>
| Picture is too dark or underexposed | ■ Reposition camera for more available light.  
■ Use Fill flash (page 20) or change your position so light is not behind the subject.  
■ Move so that the distance between you and the subject is within the effective flash range (page 20).  
■ To automatically set exposure and focus, press the Shutter button halfway and hold. When the AF/AE indicator turns green, press the Shutter button completely down to take the picture.  
■ Use P mode to adjust the Exposure and Flash Compensations (page 19).  
■ Use P mode (page 19) and Selectable Zone (see Focus Zone on page 28). |
| Picture is too light | ■ Reposition camera to reduce the amount of available light.  
■ Turn flash off (page 20).  
■ Move so that the distance between you and the subject is within the effective flash range (page 20).  
■ To automatically set exposure and focus, press the Shutter button halfway and hold. When the AF/AE indicator turns green, press the Shutter button completely down to take the picture.  
■ Use P mode to adjust the Exposure and Flash Compensations (page 19). |
Troubleshooting

Picture is not clear

- To automatically set exposure and focus, press the Shutter button **halfway and hold**. When the AF/AE indicator turns green, press the Shutter button **completely down** to take the picture.
- Clean the lens (page 64).
- Make sure camera is not in Close-up mode if you are more than 21 in. (0.7 m) from your subject.
- Place the camera on a flat, steady surface or use a tripod, especially in high-zoom settings or in low light.

Getting help

Telephone customer support

If you have questions concerning the operation of the software or camera, you may speak with a customer support representative.

Before you call

Have the camera, camera dock, or printer dock connected to your computer. Be at your computer, and have the following information available:

- Computer model
- Operating system
- Processor type and speed (MHz)
- Amount of memory (MB)
- Amount of free hard disk space
- Camera serial number
- Version of Kodak EasyShare software
- Exact error message you received

Appendix

Tips, safety, maintenance

- If the camera has been subjected to inclement weather or you suspect water has gotten inside the camera, turn off the camera and remove the battery and card. Allow all components to air-dry for at least 24 hours before using the camera again.

- Blow gently on the lens or camera screen to remove dust and dirt. Wipe gently with a soft, lint-free cloth or an untreated lens-cleaning tissue. Do not use cleaning solutions unless designed specifically for camera lenses. Do not allow chemicals, such as suntan lotion, to contact painted surfaces.

- Do not place your camera near equipment, such as electric motors. Electro-magnetic induction may corrupt pictures or cause camera malfunctions.

- Rapid changes in temperature can cause harmful condensation. Keep your camera in an airtight plastic bag and let it adjust to temperature before removing it from the bag.

- Service agreements are available in some countries. Contact a dealer of Kodak products for more information.

- For rechargeable battery disposal information, visit the Rechargeable Battery Recycling Corporation Web site at www.rbrc.com.

- For digital camera disposal or recycling information, contact your local authorities. In the US, visit the Electronics Industry Alliance Web site at www.eiae.org or the Kodak Web site at www.kodak.com/go/dx7590support.
Storage capacities

File sizes can vary due to image content and exposure. You may be able to store more or fewer pictures and videos. Favorites take up additional space in internal memory and reduce storage capacity.

Appendix

Upgrading your software and firmware

Download the latest versions of the software included on the EasyShare software CD and the camera firmware (the software that runs on the camera). See www.kodak.com/go/dx7590downloads.

Regulatory compliance

FCC compliance and advisory

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) reorient or relocate the receiving antenna; 2) increase the separation between the equipment and the receiver; 3) connect the equipment to an outlet on a circuit different from that to which the receiver is connected; 4) consult the dealer or an experienced radio/TV technician for additional suggestions.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. Where shielded interface cables have been provided with the product or specified additional components or accessories elsewhere defined to be used with the installation of the product, they must be used in order to ensure compliance with FCC regulation.
Appendix

Canadian DOC statement

DOC Class B Compliance—This Class B digital apparatus complies with Canadian ICES-003.

Observation des normes-Class B—Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

VCCI Class B ITE

English translation:
This is a Class B product based on the standard of the Voluntary Control Council for Interference from Information Technology Equipment (VCCI). If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

MPEG-4

Use of this product in any manner that complies with the MPEG-4 visual standard is prohibited, except for use by a consumer engaging in personal and non-commercial activities.
