 AAA/AA Charger:
Kodak Ni-MH Value Charger

Operating Instructions

CHARGE INDICATOR LIGHTS
One or both lights may be on during charging, depending on whether you are charging 2 or 4 batteries.

HOW TO CHARGE
1. Place 2 or 4 batteries in the AAA size batteries into the charger so that the (positive) and (negative) terminals of the batteries correspond to the same + and – mark in the charger.
When charging only 2 AAA size batteries, place them together in either the left or right side (channel) of the charger.
CAUTION: Do not mix AA and AAA size batteries in the same channel.

2. Plug the charger into an electrical receptacle (outlet). The charge indicator lights are illuminated and battery charging begins. (NOTE: Do not insert or remove batteries during this charging process.)
The charging cycle time depends on battery type. See specification chart.

TIPS
• For best performance, use only Kodak Ni-MH batteries.
• Change the batteries before using (unless using pre-charged batteries).
• Do not use charged and discharged batteries together.
• Insert batteries correctly by matching + (positive) and – (negative) terminals of the battery to the same + and – position on the charger.

IMPORTANT SAFETY INSTRUCTIONS—Save These Instructions

DANGER—RISK OF FIRE OR ELECTRICAL SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.

For convenience in a trip or in the U.S.A., use an assemblage plug adapter of the proper configuration for the power outlet. This battery charger is intended to be connected to a vertical or floor mounted power outlet.

This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the battery.

Please dispose of this product in accordance with all applicable regulations. This product contains a small amount of lead in the circuit boards. Disposal may be regulated. For disposal or recycling information, please contact your local authorities or, in the U.S.A., contact the Electronic Industries Alliance website at www.eiae.org.

Guarantee: This battery charger and batteries are guaranteed against defects in material and workmanship for one year after date of purchase. Any device damaged by these batteries due to such defect will be repaired or replaced (at our option) free of charge. In the U.S.A. and Canada, contact us at 1-800-242-2424, Mon.-Fri., 9 a.m. to 6 p.m. (Eastern Time). In Europe, contact Kodak, Consumer Relations, Rue de Stalingrad 5, B-1130 Brussels. In Japan, please contact the distributor of the product you purchased.

Thank you for purchasing the Kodak Ni-MH Battery Charger. Please read these instructions for safe operation.

Features
• Charge AA and AAA Ni-MH rechargeable batteries.
• Charge up to 4 AA or up to 4 AAA batteries.

Recommended Temperature Ranges for Use

To use (discharge) the batteries
32°–104°F (0°–45°C)

In charge the batteries
32°–104°F (0°–45°C)

Store the batteries
10°–104°F (–10°–45°C)

Using the batteries outside the above temperatures may shorten their life and decrease efficiency.
