Safety and Regulatory Information

Important Safety Information

⚠️ CAUTION:
Use of controls or adjustments, or performance of procedures other than those specified in this manual may result in injury and/or damage to the printer.

- The power outlet should be easily accessible and installed near the printer.
- Position the power cable so that it cannot be pulled on or tripped over.
- Never allow the power cable to contact hot surfaces.
- The power outlet must be grounded. An ungrounded outlet can cause fire, electric shock, or harmful interference to nearby electrical devices.
- Use only the power cable provided with the printer.
- Do not operate the printer with a damaged power cable.
- Always unplug the power cable from the printer before cleaning or when the printer is not in use.
- If the printer has been dropped or damaged, be sure a qualified service person examines the printer before you use it.
- Do not block the filter openings on the printer cabinet.
- Do not expose the printer to moisture or water.
- Do not allow any foreign objects or liquids to fall or spill inside the printer. Fire or electric shock could result.
- The thermal head becomes extremely hot during normal operation. Do not touch it.
- Alcohol pads are used to clean the thermal head and other internal printer components. In the United States for health, safety, and environment information, call 585-722-5151. Customers outside the U.S. can contact their local KODAK Service Representative.
Safety Labels

Please observe the important safety warnings that are posted on the printer.

CAUTION HOT SURFACE
To avoid burns, use caution when closing the cover.

CAUTION HOT SURFACE
The thermal head becomes extremely hot during normal operation. Do not touch it.

CAUTION SHARP OBJECTS
The metal edges of the printer may be sharp.

CAUTION SHARP CUTTER BLADE
There are sharp cutter blades inside the printer. Do not insert hands or objects.
This label is posted behind the trim tray.
Regulatory and Safety Compliance

Safety

Complies with UL 60950-1:2006 Third Edition—CAN/CSA C22.2 No. 60950-1-03
EN 60950-1:2006+A11:2009
IEC 60950-1:2005 2nd Edition
Tested for Norwegian IT Power systems 240V phase to phase

Electromagnetic Compatibility (EMC)

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause interference to radio communications. Operation of this equipment in a residential area is likely to cause interference in which case the user will be required to correct the interference at his or her own expense.

Requirements of the EMC directive 89/336/EEC were met through compliance with the following:

- EN 55022: 94 (class A) with Amendments A1:95 and A2:97
- EN 55024: 98 ITE Immunity includes the following:
  - EN 61000-4-2 ESD
  - EN 61000-4-3 Radiated RF immunity
  - EN 61000-4-4 EFT
  - EN 61000-4-5 Surge
  - EN 61000-4-6 Conducted RF immunity
  - EN 61000-4-11 Voltage dips and interruptions
- EN 61000-3-2 Harmonics
- EN 61000-3-3 Flicker

CAUTION:
This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

“Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.”

This is a Class A product based on the standard of the Voluntary
Control Council for Interference from Information Technology Equipment (VCCI). If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

Noise Emission

The operator-position noise emission value is less than 70 dB(A).*

* Average value specified in accordance to JIS Z8731

Disposal

This product contains a small amount of lead in the solder on the circuit boards. Disposal of this material may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities. In the USA, contact the Electronics Industry Alliance at www.eiae.org.

In the European Union, this symbol indicates that when the last user wishes to discard this product, it must be sent to appropriate facilities for recovery and recycling. Contact your local KODAK Representative or refer to www.kodak.com/go/recycle for additional information on the collection and recovery programs available for this product.

1 Setting Up the Printer

Package Contents

The KODAK Photo Printer 6850 is packaged with the following items:

1. Printer
2. KODAK Thermal Printer Cleaning Kit
3. Trim Tray (not installed)
4. Print Catcher (not installed)
5. (4) 6850 Power Cable (1 US, 1 Europe, 1 Australia, 1 China)
6. USB Cable
7. (2) Paper Flange
8. User Guide and software CD, not pictured (in some countries, the User Guide is provided on the CD, not in printed form)
Setting Up the Printer

Before You Begin

IMPORTANT: Your KODAK Photo Printer comes with several power cables. Be sure to select the correct power cable required for your country.

Have the following items available before you begin your printer setup:

- KODAK Photo Print Kit 6800/4R or KODAK Photo Print Kit 6800/6R which contains the correct paper and ribbon for the best print quality and print life from your printer. See Appendix A for details on the Photo Print Kit (sold separately).
- USB cable (included).

IMPORTANT: The printer weighs 56 lb (25 kg) and is heavier at the front than at the back. Use caution when lifting or moving the printer.

Recommended Air Flow Clearances

If you plan to set up the printer in a restricted space, such as in a cabinet, refer to the following illustration for the recommended air flow clearances for this type of setup.

Removing the Packing Material

The printer is packaged with protective inserts that prevent damage during shipping. Remove these inserts before using the printer. Keep the carton and packing inserts; reinstall them when repacking and transporting the printer.
1. Remove the tape from the upper cover.

2. Slide the cover release toward you, then open the upper cover carefully.
   IMPORTANT: Cover does not open beyond a 90° angle.

3. Remove the packing material.
Setting Up the Printer

Installing the Trim Tray

The trim tray collects paper trimmings that are generated when the printer cuts the prints.
- Slide the trim tray into the printer as shown.

⚠️ CAUTION:
There are sharp cutter blades inside the printer. Do not insert hands or objects.

IMPORTANT: To keep your prints dust-free and to prevent paper jams, empty the trim tray each time you change the paper.

Installing the Print Catcher

The print catcher collects the finished prints as they exit the printer.
- Attach the print catcher from the print exit slot as shown.
Loading the Ribbon

Have a KODAK Photo Print Kit 6800/4R or KODAK Photo Print Kit 6800/6R available. These kits contain the correct size ribbon for your printer. See Appendix A for details on the Photo Print Kits (sold separately).

To load the ribbon into the printer:

1. Slide the cover release toward you, then open the upper cover carefully.

**IMPORTANT:** Cover does not open beyond a 90° angle.

**CAUTION:**
*The thermal head becomes extremely hot during normal operation. Do not touch it.*

2. If you are replacing a ribbon, remove the used ribbon from the printer.

**NOTE:** Images remain on the ribbon after printing. If you need to maintain confidentiality, dispose of the used ribbon appropriately.

3. Insert your fingers into the holes in the plastic on the end of the ribbon. Remove the plastic cover from the ribbon.

**IMPORTANT:** Do not remove the wrapper from the ribbon at this time.
4. Push the bar code end of the supply spool into the spool holder on the right.
5. Place the left side of the supply spool into the spool holder on the left.
6. Rotate the thumb wheel until the lugs on the spool holder lock into the notches on the supply spool.

7. Remove the label and wrapper from the ribbon.

8. Push the right side of the take-up spool into the spool holder on the right.
9. Place the left side of the take-up spool into the spool holder on the left.
10. Adjust the take-up spool until the lugs on the spool holder lock into the notches on the take-up spool.

11. If there is any slack in the ribbon, remove it by turning the supply spool.

IMPORTANT: Slack in the ribbon can cause a paper jam when making prints.
12. Close the upper cover by pressing on the center of the cover until it clicks in place.

connecting the cables

if you plan to install the printer driver software on your computer, you will need to install the software before you connect the cables. see chapter 2, installing the printer driver software. important: you must install the printer driver software before connecting the cables or your printer will not work.

connecting the power cable

you may have received more than one power cable with your printer. be sure to use the correct power cable required for your country.

1. check that the power switch is turned off ( ).

⚠️ caution: the power outlet must be grounded. an ungrounded outlet can cause fire, electric shock, or harmful interference to nearby electrical devices.

2. connect the power cable to the power connector on the back of the printer and to a grounded power outlet.
Setting Up the Printer

Connecting the USB Cable  Use the included USB cable.

1. Check that the power switch is turned off ( ).
2. Connect the USB cable to the USB connector on the back of the printer and to the USB connector on the computer.

Turning On the Printer

1. Press the power switch to on ( ).
   
   On the operator panel, the orange Power light and the green Ready light illuminate, and the Ready message appears when the printer is initialized.

2. To turn off the printer, press the power switch to off ( ).

Loading the Paper

Have a KODAK Photo Print Kit 6800/4R or KODAK Photo Print Kit 6800/6R available. These kits contain the correct size paper for your printer. See Appendix A for details on the Photo Print Kits (sold separately).

IMPORTANT: To keep your prints dust-free and to prevent paper jams, empty the trim tray each time you change the paper.

To load the paper into the printer:
1. Remove the plastic cover from the new paper roll.  
**IMPORTANT:** *Do not remove the label from the paper roll until you have successfully loaded the paper into the printer.*

2. Attach the paper flanges to each end of the paper roll.  
   a. Line up the lugs on the green paper flange with the notches on the left side of the paper roll.  
   b. Place the green paper flange on the left side of the paper roll.  
   c. Place the black paper flange on the right side of the paper roll.  
**NOTE:** Be sure to match up the lugs on the green paper flange with the notches on the left side of the paper roll. If you do not attach the paper flange properly, the paper roll will not fit into the printer.

3. Open the paper door.  
The operator panel displays the Cover Open message.

4. Set the paper roll into the printer according to the green and black arrows on the label.

5. Remove the label from the paper roll.

6. Align the edge of the paper with the alignment marks on the paper guide.
7. Insert the paper under the pinch roller.
**IMPORTANT:** Do not advance the paper past the red line or you may cause the paper to jam.

8. Advance the paper to the red line by turning the paper feeding knob.

9. Carefully close the paper door.
   The operator panel displays the Paper Empty message.

10. Press **Paper Advance** to load the paper into the printer.
    The printer advances the paper, then cuts and discharges about 24 in. (61 cm) of blank paper. This reduces the possibility of fingerprints or other damage to the prints. It does not decrease the 750 4 x 6 in. (10 x 15 cm) print capacity of the paper roll (see page A-2).
    The operator panel displays the Ready message.

**Making a Test Print**

Make a test print to check that the printer is installed and set up correctly.

1. Press **Menu** twice until Test Print Mode appears.
2. Press **Enter** to start printing the test print.
3. Press **Clear** to return to Ready after the test print is printed.

For more information on using the operator panel in Setup mode, see “Using Setup Mode to Review Printer Settings” on page 4-2.
Online User Guide

For the latest User Guide and Quick Setup Guide:
2. Select the Standalone Printer tab.
3. Select the Technical Resources link for the 6850 Printer.
4. Select Manuals and Guides from the drop-down menu.
5. Click the link for the guide you wish to view.

NOTE: The Guides are in PDF format; ADOBE ACROBAT Reader is required to read them. Follow the on-screen directions to install ADOBE ACROBAT Reader if you do not already have it installed on your system.
2 Installing the Printer Driver Software

A printer driver is software that allows the operating software to access the printer features.

The WINDOWS 2000/XP 6850 printer driver requires the following:

<table>
<thead>
<tr>
<th>Operating System</th>
<th>Service Pack</th>
<th>Minimum Memory</th>
</tr>
</thead>
<tbody>
<tr>
<td>WINDOWS 2003 Server</td>
<td>SP1</td>
<td>512 MB</td>
</tr>
<tr>
<td>WINDOWS 2000 Professional</td>
<td>SP3</td>
<td>128 MB</td>
</tr>
<tr>
<td>WINDOWS 2000 Server</td>
<td>SP3</td>
<td>256 MB</td>
</tr>
<tr>
<td>WINDOWS 2000 Advanced Server</td>
<td>SP3</td>
<td>256 MB</td>
</tr>
<tr>
<td>WINDOWS XP Home</td>
<td>SP1</td>
<td>128 MB</td>
</tr>
<tr>
<td>WINDOWS XP Professional</td>
<td>SP1</td>
<td>128 MB</td>
</tr>
</tbody>
</table>

The printer driver also requires a functional USB port to communicate with the printer. The printer is compliant with the USB 2.0 protocol.

NOTE: If your equipment only supports the USB 1.1 protocol, data communication to the printer will be slower and may affect print times.

Installing the Printer Driver

IMPORTANT: You must have Administrator privileges to install the printer driver.

NOTE: The driver installer automatically uninstalls older versions of the 6800 printer driver.

1. Go to: [www.kodak.com/go/6850](http://www.kodak.com/go/6850) for the latest Printer Driver, Firmware, and Color profile updates.

2. Before installing the software, read the Printer Driver Readme file for important information and updates about the software.

3. Select:
   - the Standalone Printer tab
   - the **Technical Resources** link for the 6850 Printer

4. Follow the on-screen instructions to download and install the printer driver.
Customizing Printer Properties

The Printer Properties dialog box displays options for setting the printer properties.

1. For your operating system, do the following:

<table>
<thead>
<tr>
<th>WINDOWS 2000</th>
<th>WINDOWS XP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select Start &gt; Settings &gt; Printers.</td>
<td>Select Start &gt; Printers and Faxes.</td>
</tr>
</tbody>
</table>

2. Right-click the printer icon for your printer model.
4. Adjust the printer settings appropriately for your printer.

Customizing Printing Preferences

The Printing Preferences dialog box displays options for setting how your printer will print.

1. For your operating system, do the following:

<table>
<thead>
<tr>
<th>WINDOWS 2000</th>
<th>WINDOWS XP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select Start &gt; Settings &gt; Printers.</td>
<td>Select Start &gt; Printers and Faxes.</td>
</tr>
</tbody>
</table>

2. Right-click the printer icon for your printer model.
3. Select Printing Preferences.
4. On the Layout tab, click Advanced.
   
   The Advanced Options dialog box appears.
5. Adjust the printing preferences appropriately for your printer.
Uninstalling the Printer and Printer Driver

IMPORTANT: You must have Administrator privileges to uninstall the printer and printer driver.

1. For your operating system, do the following:

   **WINDOWS 2000**
   - Select *Start > Settings > Printers*.
   *The Printers dialog box appears.*

   **WINDOWS XP**
   - Select *Start > Printers and Faxes*.
   *The Printers and Faxes dialog box appears.*

2. Right-click the printer you want to remove and select *Delete*.
3. Click *Yes* to delete the printer.
5. Select *Drivers*.
6. Highlight the printer driver you want to remove and click *Remove*.
7. Click *Yes* to delete the printer driver.
8. Click *Close*. 
3 Calibrating the Printer

The KODAK Photo Printer Calibration Application allows the KODAK Photo Printer to produce the best possible color response. Printer calibration adjusts the response of the printer so that a specific data input value yields a specific color density output. When a printer is properly calibrated, it generates the correct density for each given data value.

Your KODAK Photo Printer is shipped with default factory calibration values. You should be able to set up your printer and begin printing right away without having to first calibrate the printer. However, if you are dissatisfied with the color of your prints, follow the steps in this chapter to calibrate your printer.

Installing the Calibration Application Software

2. Select:
   • the Standalone Printer tab
   • the Technical Resources link for the 6850 Printer
3. Download the KODAK Photo Printer Calibration Application for WINDOWS.
4. Review the user’s guide for the calibration application.
5. Download the calibration application.

NOTE: Before installing the software, read the Calibration Software Readme file for important information and updates about the software.

6. Follow the on-screen instructions to install the calibration software.

NOTE: The latest color profiles are also available to ensure proper color reproduction.
4 Operating the Printer

Making Prints

You make prints using photo printing software applications. For application-specific printing information, see the user’s guide or online Help for the software application.

Handling and Storing Prints

For best results:

• Make sure hands are clean and free of food, oil, and grease.
• Store prints in a cool, dry environment free of chemical contamination.
• Store prints at temperatures below 72° F (25° C) for extended periods.
• Store prints at a relative humidity between 30% and 50%.
• Avoid exposure to high-intensity light sources, particularly fluorescent light and sunlight, which are rich in ultraviolet radiation.
• Avoid exposure to vinyl items (those made of polyvinyl chloride, PVC) and any plastic that contains plasticizer. If you use transparent sleeves, make sure that they are not PVC-based.

Using Setup Mode to Review Printer Settings

Use the operator panel to review printer settings in Setup mode.

1. Press Menu to enter Setup Mode.
2. Press Menu repeatedly to scroll through the printer settings.
3. Press +/- to scroll through selections.
4. Press Enter to initiate an action or accept a change.
5. Press Clear to exit Setup Mode.
**Accessing the Printer Settings**

Press **Menu** repeatedly to scroll through the printer settings in the following order.

| Changing the wait time | Wait Time              | Press Enter to change wait time from 0 to 100 seconds. The default is 1 second. This only applies when printing 4R prints using 6R ribbon. The wait time is the length of time that the printer waits before it starts printing after receiving a 4R print. This allows the printer to receive a second 4R print that will print at the same time as the first 4R print. This decreases the print time when printing multiple 4R prints using 6R ribbon. Press:  
  • Wait Time  
  • Enter  
  • “+” or “-” to change the number  
  • Enter  
  • Clear |
5 Maintaining the Printer

To ensure good printer performance and high-quality prints, keep the printer and its environment clean and dust-free.

Cleaning the Cabinet

Clean the exterior cabinet and filter openings regularly to eliminate dust build-up and to prevent dirt from entering the printer.

⚠️ CAUTION:
Never use abrasives or harsh chemicals to clean any part of the printer. Do not allow any foreign objects or liquids to fall or spill inside the printer. Fire or electric shock could result. If any foreign object enters the printer, turn off the printer immediately, remove the power cord, and contact your KODAK Service Representative.

1. Wipe the exterior cabinet, print catcher, and trim tray with a damp, lint-free cloth.
2. Vacuum the filter openings to remove dust.

Performing Routine Maintenance

To maintain good print quality:

1. Clean the stripper plate, platen roller, and cleaning rollers monthly, using the alcohol pads included in the KODAK Thermal Printer Cleaning Kit.

2. Only clean the thermal head if directed to do so by a KODAK Service Representative. Do not include the thermal head in your monthly cleaning process.

NOTE: If there is paper or ribbon loaded in the printer, remove it before performing maintenance procedures.

⚠️ CAUTION:
Alcohol is a flammable liquid. It can cause eye irritation and dry skin. Prolonged or repeated skin contact may cause drying, cracking or irritation. Wash your hands with soap and water following any maintenance procedures where you use alcohol pads. For additional information, see the Material Safety Data Sheet (MSDS).
Cleaning the Thermal Head and Stripper Plate

⚠️ CAUTION:
Fingerprints can damage the thermal head, which looks like a glass bar. Never touch it with your bare hands or fingers.

1. Make sure the power switch is turned off ( ).
2. Slide the cover release toward you, then open the upper cover carefully.

IMPORTANT: Cover does not open beyond a 90° angle.

⚠️ CAUTION:
The thermal head becomes extremely hot during normal operation. Wait approximately five minutes to begin cleaning the head after you open the upper cover.

3. Remove an alcohol pad from its packaging. Move the pad along the entire length of the thermal head, in one direction only. When you clean the thermal head:
- Apply firm, even pressure.
- Make three passes along the thermal print head.
- Use a clean part of the pad for each pass.

4. Use another clean alcohol pad to wipe the edge of the stripper plate.
Cleaning the Platen Roller

1. Remove an alcohol pad from its packaging. Wipe the rubber section of the platen roller with the pad.
2. Rotate the roller to clean the entire surface.
3. Allow the alcohol to dry completely (about five minutes) before you resume printing.

Cleaning the Cleaning Rollers

It is essential to keep the cleaning rollers clean to prevent dirt from transferring back onto the prints and to keep the printer operating correctly.

IMPORTANT: There are two cleaning rollers in the printer. They are not interchangeable. Clean them separately to prevent reinstalling them in the wrong position.

1. Remove the rear cleaning roller by pulling up on the black knob.
2. Remove an alcohol pad from its packaging. Wipe the rubber section of the roller with the pad.
3. Reinstall the rear cleaning roller in the printer. Push the black knob until the roller clicks into place.

⚠️ CAUTION:
There are sharp cutter blades inside the front roller area. Do not insert hands or objects.

4. Repeat steps 1 - 3 to remove, clean, and reinstall the front cleaning roller.
5. Close the upper cover by pressing on the center of the cover until it clicks in place.

6. Allow the alcohol to dry completely (about five minutes) before you resume printing.

Troubleshooting

Clearing a Paper Jam

If the Paper Jam message is displayed on the operator panel, there are two methods that you can use to try to clear the paper jam.

Method 1

1. Press Paper Rewind until the Paper Empty message appears.

2. Press Paper Advance to re-load the paper into the printer. The printer advances the paper, then cuts and discharges about 24 in. (61 cm) of blank paper. This reduces the possibility of fingerprints or other damage to the prints (see page A-2). The operator panel displays the Ready message.

Method 2

If the Paper Jam message is still displayed on the operator panel:

1. Turn off the printer and open the upper cover.
2. Remove the ribbon from the printer.

⚠️ CAUTION: Prevent damage to the printer. Do not pull abruptly on the paper.

3. Slowly and carefully pull the jammed paper out of the printer.

4. Cut off any damaged or printed areas of the paper.

NOTE: Do not damage or mark any of the rollers.
5. Close the upper cover and turn on the printer.

6. Press Paper Rewind to rewind the paper into the printer.
   If the Paper Jam message still appears on the operator panel, press Paper Rewind again.

7. Open the upper cover and reload the ribbon. See “Loading the Ribbon” on page 1-5.

8. Close the cover.

NOTE: If the Paper Jam message is still displayed on the operator panel, and you are at the end of a paper roll, it is possible that a segment of paper is too short to automatically exit the printer. Remove the front cleaning roller (see “Cleaning the Cleaning Rollers” on page 5-3) and remove the segment of paper.

Recovering from a Power Interruption

⚠️ CAUTION:
If the printer loses power while printing, the printer stops with the thermal head positioned against the platen roller. The platen roller could be deformed and damaged if the thermal head is left in this position.

If a power outage occurs:
1. Open the upper cover immediately to release the pressure on the platen roller. Leave the cover open until power is restored.

2. When power is restored, restart the printer by following the procedure for “Clearing a Paper Jam” on page 6-4.

3. Submit your print job again.

Paper and Ribbon

Each Photo Print Kit contains the correct media set (roll-feed paper and ribbon) for your printer model. Photo Print Kits are sold separately.

IMPORTANT: For best results, replace both the paper and ribbon at the same time.

* The paper roll contains a small amount of additional paper to allow for the extra feed when loading the paper and to minimize end-of-roll impressions.

** Paper and ribbon rolls contain material to make the stated print quantity. Actual number of prints will vary depending on mix of 6 x 8 and 4 x 6 prints produced.

Handling and Storing the Paper and Ribbon

For the best quality prints, carefully handle and store your paper and ribbon:

- To avoid fingerprints, handle the ribbon by the spool ends; do not touch the ribbon material. Do not touch the glossy side of the paper.
- Store the paper and ribbon away from direct sunlight.
Thermal Printer Cleaning Kit

Use the KODAK Thermal Printer Cleaning Kit when performing routine maintenance on the printer (see page 5-1). One Thermal Printer Cleaning Kit is included with your printer.

⚠️ CAUTION:
Alcohol is a flammable liquid. It can cause eye irritation and dry skin. Wash your hands with soap and water following any maintenance procedures where you use alcohol pads.

Packing and Transporting the Printer

⚠️ CAUTION:
Do not ship the paper and ribbon in the printer. Doing so may cause physical damage to the printer during shipping. Ship paper and ribbon separately.

1. Remove the paper and ribbon from the printer.
2. Reinstall the packing materials (see page 1-2).
3. Repack the printer in the original packing box. See the packing/unpacking instructions included with the box.
