Getting started

Welcome to your Kodak EasyShare digital picture frame. Viewing your pictures and videos couldn’t be simpler!

Installing the software

Install the software from the CD included with your frame. The software, which includes the latest version of Kodak EasyShare software, ensures the best experience when connecting the frame with your computer.

1 Close all software applications that are open on your computer (including anti-virus software, see the anti-virus software manual for details.).

2 Place the EasyShare software CD into the CD-ROM drive.

3 Load the software. If the install window does not appear, choose Run from the Start menu and type d:\setup.exe where d is the drive letter that contains the CD.

4 Follow the on-screen instructions to install the software. Select Complete to automatically install the most commonly used applications, or Custom to choose the ones you wish to install.

NOTE: When prompted, take a few minutes to electronically register your picture frame and software. To register later, visit www.kodak.com/go/register.

5 If prompted, restart the computer. If you turned off anti-virus software, turn it back on.
Using the remote control

Activating the remote control
An activation tab protects the remote control’s battery during shipment.

- Pull out the tab to start using the remote.

There is no need to open the battery compartment or remove the battery.

Storing the remote control

1. Install the remote control holder on the back of the frame (page i).
2. Slide the remote into the holder for convenient, out-of-the-way storage.
Getting started

Using the remote control buttons
Some buttons are also on the back of the frame (page ii). They operate identically.

* First, turn on the power switch on the frame.
Setting up your picture frame

Buttons and controls

All buttons and controls described in this guide (for example: press \(\downarrow\)) are on the remote control unless otherwise noted.

Connecting the power cable

1. Plug in the power cable.

   Your power cable (included with the frame) may be different from the one pictured. Use the plug that accommodates your type of power outlet.

2. Pull out and extend the stand on the frame back and place the frame on a flat, stable surface.

   NOTE: Your frame is set up to display in landscape orientation \(\text{landscape}\). You can turn it to portrait \(\text{portrait}\) but you must also change the setting. Press Home \(\rightarrow\), Settings \(\rightarrow\) Viewing options \(\rightarrow\) Frame orientation. See page 17.
Getting started

Inserting a card or camera

- Insert a memory card.

- Connect a digital camera or other USB device.

a) USB cable included with your USB device.
b) USB adapter cable included with your EX model picture frame.
Getting started

Turning on the frame

■ Press the power switch to On.
NOTE: You can leave the power switch On, and use the remote control to turn the frame off and on.

Setting your language

The language screen appears the first time you turn on your frame.

■ Press to select your language, then press OK.
To change the language at a later time, press Home, Settings → Language. See page 18.

Viewing your first slide show!

■ A slide show starts automatically when you turn on the frame.
■ The pictures/videos are displayed in the order they appear on the card or other device.
2 Viewing pictures and videos

When you turn on your frame, a slide show automatically starts. Depending on where pictures are stored in your frame or what devices are connected—the slide show plays from a memory card first, then from a USB device, and internal memory (My Frame), in that order.

Running a slide show

- A new slide show starts automatically when you insert a card or connect a USB device. The new slide show replaces whatever is currently displayed (slide show, thumbnails, single picture).
- A slide show plays continuously until you stop it or turn off the frame.
- To start a slide show from any selected picture (in thumbnail or single view), press .
- You can change the slide duration and transition style (see page 17).

Viewing thumbnails

- To view your pictures as multi-up thumbnails, press ▶ when a slide show is playing or from a single view.
- To navigate through the thumbnails, press ◀.
- Videos are marked with 🎥.
Viewing pictures and videos

Viewing a single picture

- To view a single, full-screen picture, highlight it in thumbnails view and press OK.
- To magnify a picture up to 8X, press repeatedly. To view other parts of the picture, press Press repeatedly to return.
- To rotate a picture, press .

Playing a video

- In thumbnails view, videos are marked with . To play the video, highlight it and press OK.
- During a slide show, videos play automatically. When the video ends, the slide show resumes.
- Video buttons on the remote control:

Viewing pictures and videos

Choosing a different picture location
You can view pictures from different locations or sources.

2. Press ➡️ to highlight a picture location.
3. Press OK to display thumbnails of the pictures in that location.
4. Press 🔄 to start a slide show. Or, navigate through folders or albums to your pictures, then press 🖼.

Possible picture locations:

- My Slideshow (EX models)—designate your favorite pictures to run automatically on a wireless frame. See page 23.
- My Frame—the frame’s internal memory. Copy your special pictures into My Frame from a memory card or other device (page 10).
- Memory card—appears when you insert a card (page 5). The label and icon indicate the type of card.
- Camera—appears when you connect a digital camera via USB cable (page 5).
- USB drive—appears when you insert a USB flash drive (page 5).
- Network computer (EX models)—appears if you are connected to a wireless network. Lets you display pictures that are stored on your computer. See Using Wi-Fi mode—EX models only, page 19.
- Kodak Gallery (EX models)—appears if you have set up your Gallery account and are connected to a wireless network. Lets you display your albums from the Gallery. See Setting up your Gallery account, page 22.
- Settings—customize and configure your frame. See Changing frame settings, page 16.
3 Doing more with your frame

Copying pictures on your frame

Copy pictures/videos from your current picture location to any other connected device or location. For example, copy pictures from a memory card to the frame’s internal memory (My Frame).

1. Press \( \text{MENU} \) to find a picture/video, then press \( \text{MENU} \).
2. Press \( \) to highlight Copy, then press OK.
3. Press \( \) to highlight the location you want to copy to, then press OK.

The picture/video is copied.

To copy multiple pictures/videos, see page 12.

Copying between your frame and computer

Copy pictures/videos via the included USB cable. For wireless copying (EX models only), see page 23.

Connecting to your computer

(USB cable included with frame)
Doing more with your frame

Copying pictures to/from your computer

Copy pictures between your frame and your computer using your computer's normal file copying tools. See page 35 for the file formats that the frame can display.

1 Connect the USB cable from the frame to your computer (see page 10).

2 On your computer, open My Computer or Windows Explorer.  
   The picture frame appears as removable drives—one drive for each connected picture location in the frame, in this order: internal memory, memory cards, USB devices.

3 Navigate to the pictures you want to copy. Then drag and drop them to the new location.

See your computer documentation for more information on copying files.

Copying pictures from EasyShare software

It's easy to copy pictures/videos from My Collection to your frame.

1 Install EasyShare software to make sure you have the latest version (see page 1).

2 Connect the USB cable (see page 10).

3 On your computer, open EasyShare software. Select the pictures in My Collection and drag them into the Picture tray.

4 In the menu bar, select File → Copy to.  
   The picture frame appears as removable drives—one drive for each connected picture location in the frame, in this order: internal memory, memory cards, USB devices.

5 Select the frame location to which you are copying.

6 Select Best For Digital Picture Frame to reduce the resolution of the pictures you are copying. Full resolution is unnecessary and quickly fills up the frame's memory.

7 Click Copy. Pictures are copied to your frame.
Deleting pictures/videos

1 Press \( \text{Up} \) to find a picture/video, then press \( \text{OK} \).
2 Press \( \text{Up} \) to highlight Delete, then press OK.
3 Highlight Delete and press OK again to confirm. To cancel the deletion, highlight Exit and press OK.

The picture/video is deleted.

To delete multiple pictures/videos, see page 12.

NOTE: You can delete pictures/videos from a card, internal memory, and some USB devices.

Selecting multiple pictures/videos

Use the multi-select feature to copy, delete, or print two or more pictures; or to play a slide show of selected pictures/videos.

Selecting one at a time

1 In thumbnails view, press \( \text{Up} \) to highlight a picture/video, then press \( \text{OK} \).
2 Continue selecting pictures/videos.

A check mark appears on the selected pictures. Press \( \text{OK} \) again to remove a check mark. You can now view a slide show, copy, print, delete, etc. all selected pictures.
Doing more with your frame

Selecting all

1. Press \( \text{menu} \) whenever pictures/videos are displayed (slide show, video, single picture).
2. Press \( \text{select} \) to highlight Select all, then press OK.
   A confirmation screen appears, then your picture display reappears. A check mark is displayed on all pictures/videos in your current location.
3. To remove all check marks, press \( \text{menu} \), highlight Select / Unselect all and press OK.
4. Highlight Unselect all and press OK.
   A confirmation screen appears, then your picture display reappears. All check marks are removed.

Printing pictures

Your frame is compatible with PictBridge technology, so you can print directly to PictBridge enabled printers.

Connecting the frame to a PictBridge enabled printer

1. Turn off the frame and printer.
2. Connect the USB cable (included with your frame) from the frame to the printer.
Printing from a PictBridge enabled printer

1. Turn on the printer. Turn on the frame.
   *The USB connection mode screen appears on the frame.*

2. Change your connection mode from computer to printer. Select Connect to printer, then press OK.
   *If the USB connection mode screen does not automatically appear, change the connection mode manually, see *Manually changing connection mode*, page 14.*

3. If you are in a slide show or single view, press menu. If you are in thumbnails view, press † to find a picture, then press menu.

4. On the Menu screen, highlight Print, press OK, then highlight Print again, and press OK.
   *The picture is printed.*

To print multiple pictures, see page 12.

5. Change your connection mode back to Connect to computer. See *Manually changing connection mode*, page 14.

Manually changing connection mode

When your frame is connected to a computer, the connection mode must be Connect to computer. When it's connected to a printer, the connection mode must be Connect to printer. You can change the connection mode manually.

1. Disconnect the printer or computer from the frame.

2. On the remote control, press home.

3. Select Settings → Device configuration → USB connection mode. Select the mode you need, printer or computer. See page 18.

4. Reconnect the printer or computer. If you are printing, continue with step 3 of the printing directions in *Printing from a PictBridge enabled printer*, page 14.
Doing more with your frame

Playing music

1. Press ■. Your picture or slide show is paused.
2. Press ▼ to highlight your music location. Then press OK.
3. Press ▲ to locate your music files. Then press OK.
4. Press ▼ to go to the next or previous song, or select Play all songs. Then press OK. Your music starts playing.
5. Press ▶ to return to your picture or slide show. Your selected music continues to play as the slide show resumes. When music is playing, videos play without their related audio.
6. To turn off music, press ■, then ■.
7. Press ▶ again to return to your pictures.

Notes on playing music:
- A headphone jack is available on the side of the frame (page ii).
- Adjust the volume with the +/− buttons.
- Press / to mute the music.
4 Changing frame settings

The options in the Setup menu let you customize and configure your frame.

1. Press Home .

2. Press to highlight Settings , then press OK.

3. Choose a setting and follow the screen directions. Press OK to accept your selections.

4. Press the Back button to exit.

Changing frame settings

Upgrading your firmware

Firmware is the software that runs on your frame. To check for the latest version of firmware, visit www.kodak.com/go/digitalframedownloads.

Follow these directions to download and upgrade your frame firmware.

1. On your computer, go to www.kodak.com/go/digitalframedownloads.
2. Follow the screen directions to download the frame firmware to your computer.
3. Copy the IMG file to your frame. See page 10 for copying files.
   - You can copy the IMG file to a memory card or USB flash drive, then insert into the frame; or, you can connect your computer and frame with the USB cable and copy the IMG file directly to the frame.
4. With the IMG file loaded on the frame, press Home 🏠, then select Settings and press OK.
5. Select Firmware Upgrade and press OK to begin the upgrade.
   IMPORTANT: Do not turn off the frame during the upgrade!
6. When the upgrade is complete, turn off the frame and unplug the power cable. Plug the power cable back in and turn on the frame.
5 Using Wi-Fi mode—EX models only

Wireless operation is available on Kodak EasyShare EX-811 and EX-1011 digital picture frames.
For more information on wireless operation and networks, visit www.kodak.com/go/wifisupport or www.wi-fi.org.

What are some of the wireless features of my frame?
- Display pictures on your frame directly from your computer hard drive (see page 21).
- Display pictures from your Kodak EasyShare Gallery albums (see page 22).
- Copy pictures from your frame to your computer (see page 23).

Wireless networking and the Internet
Some wireless functions on your frame, including viewing pictures on Kodak EasyShare Gallery (see page 22), require access to the Internet. Most public and home networks are connected to the Internet, typically through an Internet Service Provider (ISP).

Setting up your frame for wireless operation
Before you start
On your computer, make sure you:
- Install the software from the CD that is packaged with your frame (page 1).
- Enable media sharing in Windows media player 11 (included on the CD). Select Library → Media Sharing, then follow the screen directions.
Perform the setup

1. Make sure your computer and router are on.
2. Remove all memory cards or other USB devices from your frame. Turn it on.
   The first time you turn on your frame (after you select your language), the Network connection screen appears.
3. When asked “Do you want to connect your frame to a wireless network?”, select Yes, then press OK to begin scanning for available networks.
   If you select No, you can set up the network later: See Set up your network at a later time, page 21.
4. Select your network from the list of available networks, then press OK.
   The frame connects to your network and then scans for available computers or other devices.
   NOTE: If you have network security turned on, you are prompted to enter your security information. If you are not sure of your network information, contact your system administrator or the person who set up your network.
5. Select your home computer from the list, then press OK.
6. When the Setup complete message is displayed, press OK.
   If you are unable to connect to your network or see your home computer, go to the troubleshooting help on page 29 of this guide or visit www.kodak.com/go/digitalframesupport.
Using Wi-Fi mode—EX models only

Set up your network at a later time
The first time you turn on your frame, the Network connection screen appears and asks if you want to connect your frame to a wireless network. You can answer No and perform the setup at a more convenient time.

1. Press 🌐, then go to Settings → Manual → Enable/Disable connections.
2. Select Enable, then press the Back button.
3. Select Network again, then Scan for wireless networks.

Viewing pictures over your wireless network
Pictures are accessed from your computer via Windows Media Player 11. To make sure you have version 11, install the software from the CD that was packaged with your frame (see page 1).

1. Turn on your computer and your picture frame. Then press Home 🏡.
2. Press 📷 to highlight your network computer, then press OK.
   - If you have multiple computers on your network, first select Network Computer 🌐, then select the computer from the list.

   NOTE: The first time you connect, a window may appear on your computer screen alerting you to a new device. Follow the prompts to “allow” the frame on your computer.
3. Follow the prompts to choose the pictures, then press OK.
   - Pictures are displayed as thumbnails. Press 📷 to play a slide show.

   If your network computer is not listed on the Home screen, or for more information, go to the troubleshooting help on page 29 of this guide or visit www.kodak.com/go/digitalframesupport.
Setting up your Gallery account

You can display pictures directly from the Kodak EasyShare Gallery via the Internet. Perform this one-time setup to connect your frame to your existing Gallery account.

1. Press Home, then highlight Settings and press OK.
2. Select Kodak Gallery and press OK.
3. If you are outside the United States, select your location and press OK.
4. Select Username. On the on-screen keyboard, press to enter your existing Gallery username (usually your email address). Press OK after each character. When the entire username is entered, highlight Done, then press OK.
5. Select Password. On the on-screen keyboard, enter your existing Gallery password (as described for Username), highlight Done, then press OK.

Viewing pictures from the Gallery

View pictures you have uploaded to Kodak EasyShare Gallery.

1. Turn on your computer and your picture frame, and make sure your Internet connection is live.
2. Press Home, then press to highlight Kodak gallery, then press OK.
3. Follow the prompts to choose the pictures, then press OK.

*Pictures are displayed as thumbnails. Press to play a slide show.*

NOTE: Slide shows displayed from the Gallery may have a transition time between slides of 1 minute.
Creating My Slideshow

Designate any picture location on your home computer or from the Gallery as My Slideshow. My Slideshow will run automatically each time you turn on your frame.

1. When viewing thumbnails, a slideshow, or a single view picture, press  .
2. Select Set as My Slideshow, then press OK.

*The pictures/videos in your current viewing location will now be included in the slideshow that plays each time the frame is turned on.*

You can also play My Slideshow anytime. Press Home , then select My Slideshow.

Copying pictures to your computer—wirelessly

Kodak picture transfer software (included on the software CD packaged with your EX-model frame) lets you wirelessly copy pictures and videos from the frame to your computer. Make sure you install the software before you proceed (see page 1).

1. Open Kodak picture transfer software on your computer: right-click the icon in the lower right corner of the screen.
2. Follow the screen directions to allow your frame to have access to your computer.

3. On the frame, display a picture in single view, then press  .
4. Press to highlight Copy, then press OK.
5. Press to highlight Network Computer , then press OK.

To copy multiple pictures/videos, see page 12.
Glossary of common wireless network terms

**Access point**—(Also called AP.) A wireless network transceiver or “base station” hub, often used to connect a local area network to one or more wireless devices. An access point can also provide a communication link to a wired local area network.

**Ad Hoc**—A client setting for a wireless local area network that allows devices connected to the network to communicate with one another directly, independent of an access point or router.

**Bridge**—A product that connects a local area network to another local area network that uses the same protocol (for example, wireless, Ethernet or token ring). Wireless bridges are commonly used to link buildings in campuses.

**Client**—An application on a computer or device connected to a network that requests services (files, print capability) from another connected computer or device on the network.

**Device-to-device**—See Ad Hoc.

**DHCP**—Dynamic Host Configuration Protocol: a utility that enables a server to dynamically assign IP addresses from a predefined list and limit their time of use so they can be reassigned. Without DHCP, all of the IP addresses of all the clients on the network would have to be manually entered. With DHCP, whenever a client connects to the network, it automatically gets an IP address assigned to it.

**DNS**—Domain Name System (or Service, or Server): a program that translates domain names to IP addresses by accessing a database maintained on a collection of Internet servers. The program works behind the scenes to facilitate surfing the Web with alpha versus numeric addresses. A DNS server converts a name like mywebsite.com to a series of numbers like 107.22.55.26. Every Web site has its own specific IP address on the Internet.
Using Wi-Fi mode—EX models only

**Domain name**—The portion of a URL or Web address that identifies a specific Web site. For example, the domain name portion of the URL http://www.kodak.com is kodak.com.

All domain names have a suffix that indicates the top level domain (TLD) it belongs to. Examples include:

- com: US commercial business
- gov: US government agency
- edu: US educational institution
- mil: US military organization
- net: US network organization
- org: US nonprofit organization
- au: Australia
- br: Brazil
- ca: Canada

**DSL**—Digital Subscriber Lines: various technology protocols for high-speed data, voice and video transmission over ordinary twisted-pair copper POTS (Plain Old Telephone Service) telephone wires.

**Dynamic IP address**—An IP address assigned to a client, each time the client connects to the network. The dynamic IP address is configured by the DHCP server and can be different each time the client connects to the network.
Encryption key—An alphanumeric (letters and/or numbers) series that enables data to be encrypted then decrypted so it can be safely shared among members of a network. WEP uses an encryption key that automatically encrypts outgoing wireless data. On the receiving side, the same encryption key enables the computer to automatically decrypt the information so it can be read.

Infrastructure—A client setting for a local area network that allows devices connected to the network to communicate with one another through a central access point or router. This configuration is commonly used in wireless home networks.

IP—Internet Protocol: technology that supports voice, data and video transmission via IP-based local area networks, wide area networks, and the Internet. This includes VoIP (Voice over IP).

IP address—A number that identifies each sender or receiver of information that is sent across the Internet.

Network name—Identifies the wireless network for all the shared components. During the installation process for most wireless networks, you must enter the network name or SSID. Different network names are used when setting up your individual computer, wired local area network, or workgroup.

Passphrase—A text string used for WPA security on a Wi-Fi wireless network. A passphrase may contain up to 31 alphanumeric characters, including spaces and other special characters.

NOTE: A passphrase used for WPA security is not the same as a WEP key, nor is it the same as a passphrase commonly found in router software that is used to generate a WEP key.

Router—An access point (AP) or hub that sends data from one local area network (LAN) or wide area network (WAN) to another. A router monitors and controls data flow and sends information using the most efficient route based on traffic load, line costs, speed, bad connections, etc.

SSID—Service Set Identifier: also referred to as a network name, since it is essentially a name that identifies a wireless network. The identifier is attached to the wireless local area network (WLAN) and acts as an identifier when a device tries to connect to the system. A device will not be permitted to join the network unless it can provide
Using Wi-Fi mode—EX models only

the unique SSID. An SSID can be broadcast by the network router, allowing devices to
detect it as an available network. An SSID does not supply security to the network.

SSL—Secure Sockets Layer: a commonly used encryption scheme used by many
online retail and banking sites to protect the financial integrity of transactions.

TCP/IP—Transmission Control Protocol/Internet Protocol: the underlying technology
behind the Internet and communications between computers in a network.

URL—Uniform Resource Locator: also referred to as a Web address, since it
identifies the location of a file or resource on the Web. For example, the URL for the

WEP—Wired Equivalent Privacy: basic wireless security provided by Wi-Fi. In some
instances, WEP may be all a home or small-business user needs to protect wireless
data. WEP is available in 40-bit (also called 64-bit), or in 104-bit (also called 128-bit)
encryption modes. As 104-bit encryption provides a longer algorithm that takes
longer to decode, it can provide better security than basic 40-bit (64-bit) encryption.

WEP key—A text string used for WEP security on a Wi-Fi wireless network. A WEP
key with 10 or 23 characters can include numbers and the letters A - F and are not
case-sensitive. 5 and 13 character WEP keys can include numbers and all letters (as
well as some special characters) and are case sensitive.

WPA—Wi-Fi Protected Access: a Wi-Fi security standard that provides a high level of
wireless network security. It uses data encryption through the Temporal Key Integrity
Protocol (TKIP). TKIP scrambles the keys and ensures that the keys haven’t been
tampered with. User authentication is performed through the Extensible
Authentication Protocol (EAP) to ensure that only authorized network users can
access the network.

Wi-Fi—Wireless Fidelity: a term developed by the Wi-Fi Alliance commonly used to
describe any type of 802.11 standard wireless network. Products tested and approved
as “Wi-Fi Certified” (a registered trademark) by the Wi-Fi Alliance are certified as
interoperable with each other, even if they are from different manufacturers.

Frame cannot connect to the wireless network — “Wireless network not found” appears.

- Make sure the network profile settings on your frame match those of the network. In an Infrastructure network, you can usually view the network settings with the software program included with the router or through the interface of a connected device. See the router or device documentation for details.
  - If possible, note the following settings for the network, then change the profile settings on your frame to match them:
    - SSID
    - Wi-Fi mode (Infrastructure)
    - Security (none, WEP, or WPA-PSK)
    - Dynamic IP (yes or no)
    - Connect Mode (yes - ask before connecting, or no - connect automatically)

**NOTE:** Many wireless network routers employ the use of a WEP passphrase for generating a WEP security key code. If WEP security is enabled for the network, make sure the key code, **not** the passphrase, is entered in the security settings for the network profile on the camera.

Important safety instructions

⚠️ CAUTION:
Do not disassemble this product; there are no user-serviceable parts inside. Refer servicing to qualified service personnel. Do not expose this product to liquid, moisture, or extreme temperatures. The use of controls, adjustments, or procedures other than those specified herein may result in exposure to shock and/or electrical or mechanical hazards. If the LCD breaks, do not touch the glass or liquid. Contact Kodak customer support.

- The use of an accessory that is not recommended by Kodak may cause fire, electric shock, or injury. For approved accessories, visit www.kodak/go/accessories.
- Use only a USB-certified computer equipped with a current-limiting motherboard. Contact your computer manufacturer if you have questions.
- When removing the battery from the remote, allow it to cool; it may be hot.
- Follow all warnings and instructions supplied by the battery manufacturer.
- Use only batteries approved for this product to avoid risk of explosion.
- Keep batteries out of the reach of children.
- Do not allow batteries to touch metal objects, including coins. Otherwise, a battery may short circuit, discharge energy, become hot, or leak.
- Do not disassemble, install backward, or expose batteries to liquid, moisture, fire, or extreme temperature.
- Remove the battery when the product is stored for an extended period of time. In the unlikely event that battery fluid leaks inside the product, contact Kodak customer support.
- In the unlikely event that battery fluid leaks onto your skin, wash immediately with water and contact your local health provider. For additional health-related information, contact your local Kodak customer support.
- Dispose of batteries according to local and national regulations. Visit www.kodak.com/go/support

www.kodak.com/go/kes.

■ Do not charge non-rechargeable batteries.
For more information on batteries, visit www.kodak.com/go/batterytypes.

■ Digital picture frame and remote control battery may include perchlorate material.
Special handling may apply in California.

■ Read and follow all warnings and instructions supplied by the battery manufacturer.

⚠️ CAUTION:
EX models only: When using this product, it should be installed and operated with a minimum distance of 7.9 in. (20 cm) for 2.4 GHz operations between the radiator and your body. This transmitter must not be collocated or operate in conjunction with any other antenna or transmitter.

Downloading your software and firmware
Download the latest versions of the software included on the Kodak EasyShare software CD and the frame firmware—www.kodak.com/go/digitalframedownloads. See page 18 for upgrading firmware.

Additional care and maintenance
■ Wipe the LCD gently with a soft, lint-free cloth or an untreated lens-cleaning tissue. Do not use cleaning solutions unless designed specifically for LCD screens. Do not allow chemicals, such as suntan lotion, to contact painted surfaces.

■ Service agreements are available in some countries. Contact a dealer of Kodak products for more information.

■ For digital frame disposal or recycling information, contact your local authorities. In the US, visit the Electronics Industry Alliance Web site at www.eiae.org or visit www.kodak.com/go/digitalframesupport.
Limited warranty

Kodak warrants Kodak consumer electronic products and accessories ("Products"), excluding batteries, to be free from malfunctions and defects in both materials and workmanship for one year from the date of purchase. Retain the original dated sales receipt. Proof of the date of purchase will be required with any request for warranty repair.

Limited warranty coverage

Warranty service is only available from within the country where the Products were originally purchased. You may be required to ship Products, at your expense, to the authorized service facility for the country where the Products were purchased. Kodak will repair or replace Products if they fail to function properly during the warranty period, subject to any conditions and/or limitations stated herein. Warranty service will include all labor as well as any necessary adjustments and/or replacement parts. If Kodak is unable to repair or replace a Product, Kodak will, at its option, refund the purchase price paid for the Product provided the Product has been returned to Kodak along with proof of the purchase price paid. Repair, replacement, or refund of the purchase price are the sole remedies under the warranty. If replacement parts are used in making repairs, those parts may be remanufactured, or may contain remanufactured materials. If it is necessary to replace the entire Product, it may be replaced with a remanufactured Product. Remanufactured Products, parts and materials are warranted for the remaining warranty term of the original Product, or 90 days after the date of repair or replacement, whichever is longer.

Limitations

This warranty does not cover circumstances beyond Kodak’s control. This warranty does not apply when failure is due to shipping damage, accident, alteration, modification, unauthorized service, misuse, abuse, use with incompatible accessories or attachments (such as third party ink or ink tanks), failure to follow Kodak’s operation, maintenance or repacking instructions, failure to use items supplied by Kodak (such as adapters and cables), or claims made after the duration of this warranty. Kodak makes no other express or implied warranty for this product, and

www.kodak.com/go/support
Appendix

disclaims the implied warranties of merchantability and fitness for a particular purpose. In the event that the exclusion of any implied warranty is ineffective under the law, the duration of the implied warranty will be one year from the purchase date or such longer period as required by law. The option of repair, replacement, or refund is Kodak’s only obligation. Kodak will not be responsible for any special, consequential or incidental damages resulting from the sale, purchase, or use of this product regardless of the cause. Liability for any special, consequential or incidental damages (including but not limited to loss of revenue or profit, downtime costs, loss of the use of the equipment, cost of substitute equipment, facilities or services, or claims of your customers for such damages resulting from the purchase use or failure of the Product), regardless of cause or for breach of any written or implied warranty is expressly disclaimed.

Your rights

Some states or jurisdictions do not allow exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. Some states or jurisdictions do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific rights, and you may have other rights which vary from state to state or by jurisdiction.

Outside the United States and Canada

In countries other than the United States and Canada, the terms and conditions of this warranty may be different. Unless a specific Kodak warranty is communicated to the purchaser in writing by a Kodak company, no warranty or liability exists beyond any minimum requirements imposed by law, even though defect, damage, or loss may be by negligence or other act.
FCC compliance and advisory

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) reorient or relocate the receiving antenna; 2) increase the separation between the equipment and the receiver; 3) connect the equipment to an outlet on a circuit different from that to which the receiver is connected; 4) consult the dealer or an experienced radio/TV technician for additional suggestions.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. Where shielded interface cables have been provided with the product or specified additional components or accessories elsewhere defined to be used with the installation of the product, they must be used in order to ensure compliance with FCC regulation.

FCC and Industry Canada

This device complies with Industry Canada RSS-210 and FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Appendix

CE
Hereby, Eastman Kodak Company declares that this Kodak product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
This digital picture frame EX-811 and EX-1011 transmits in 12dBm. In France, the power level is limited to 10dBm in outdoor environments, per regulations. When in France, use the wireless functions of this device indoors only.

Canadian DOC statement
DOC Class B Compliance—This Class B digital apparatus complies with Canadian ICES-003.
Observation des normes-Classe B—Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Waste Electrical and Electronic Equipment labeling

The lamps inside the EX-1011 model contain mercury and must be recycled or disposed of in accordance with local, state, or federal laws. For more information on recycling, visit www.lamprecycle.org or www.eiae.org. Find additional information at www.kodak.com/go/hse or 1-800-242-2424.
